WELCOME, INTRODUCTIONS, AND LOGISTICS

Who are **we**?

Who are **you**? (we'll call on you)

- Name, Affiliation, Position
- Have you collected avian data yourself before?
- What type of avian data you collect?
- How would you like to use AKN?

INTRODUCTIONS

A FEW LOGISTICS...

- The Agenda with links (bookmark this):
<https://www.dodakn.org/training-class-website/>
- Session: interactive & casual
- Office hours: 16 hours monthly, sign up here

<https://www.dodakn.org/office-hours-booking-page/>

AVIAN
KNOWLEDGE NETWORK

Avian Knowledge Network (AKN): the Who, What, Where, When, Why, and How
DoW AKN NMFWA Training, Columbus, OH, March 30, 2026

Agenda Tools Slides Exercises Resources About Us Archive

Agenda
All times Eastern Daylight Time (EDT)

Monday, March 30
All times Eastern Daylight Time (EDT)

0800 (65 min) — Welcome, Introductions, and the Avian Data Lifecycle
Welcome to the DoW / AKN workshop on using the AKN technologies for managing and utilizing avian data in the AKN.

- Welcome and introductions
- Review the workshop agenda
- The Avian Data Lifecycle
- What to do if you encounter technical problems

0905 (40 min) — AKN Project Data 101: project database, programs, protocols, and sampling units
We will cover how the AKN represents observational data and how to find the best way to organize and curate your data in a project database.

- How the AKN organizes data
- What is a Program?
- What is a Project Database?
- What is a Protocol?
- Choosing and managing protocols (DEMONSTRATION of Project Leaders for configuring protocols, linked from the DOD AKN Portal)
- What are Sampling Units?

- Parking lot items

DoW AKN PORTAL

www.dodakn.org

PLUS – DELTA METHOD

- Feedback from workshop to continue to improve

<u>+ PLUS</u> What went well and should be continued or repeated	<u>Δ DELTA</u> What could be changed or improved for future iterations.

OFFICE OF THE ASSISTANT SECRETARY OF DEFENSE
3400 DEFENSE PENTAGON
WASHINGTON, DC 20301-3400

MEMORANDUM FOR DEPUTY ASSISTANT SECRETARY OF THE ARMY
(ENVIRONMENT, SAFETY AND OCCUPATIONAL HEALTH)
DEPUTY ASSISTANT SECRETARY OF THE NAVY
(ENVIRONMENT AND MISSION READINESS)
DEPUTY ASSISTANT SECRETARY OF THE AIR FORCE
(ENVIRONMENT, SAFETY AND INFRASTRUCTURE)

SUBJECT: Department of Defense Avian Knowledge Network Program

The Department of Defense (DoD), like other federal agencies, has significant regulatory, management, and stewardship responsibilities related to migratory birds. These requirements are driven primarily by the Migratory Bird Treaty Act (MBTA), the "Military Readiness Rule" (50 CFR § 21.15, Authorization of take incidental to military readiness activities) and Executive Order (EO) 13186 "Responsibilities of Federal Agencies to Protect Migratory Birds." In accordance with EO 13186, DoD has also established a Memorandum of Understanding with the U.S. Fish and Wildlife Service outlining the management and stewardship activities DoD will implement for migratory bird conservation. All DoD natural resources conservation programs support DoD access to its land, air, and water resources for realistic military training and testing and to sustain the long-term ecological integrity of the resource base and the ecosystem services it provides, in accordance with the Sikes Act. Collecting data and information from ongoing surveys, inventories, and monitoring are essential to make informed management decisions, efficiently and effectively meet regulatory requirements (e.g., the MBTA, the Sikes Act), conduct environmental analyses, and support planning to adaptively manage migratory bird populations in the context of mission activities. As such, the DoD spends millions of dollars annually to collect these data.

However, even with the collection of large amounts of data, DoD faces significant challenges to fully utilize and optimize our avian data. These challenges include: (1) inefficient access to data for regulatory requirements, environmental analyses, and planning; (2) a lack of visibility on avian species population trends and management across the Military Services and broader landscapes; and (3) a lack of a centralized, secure data repository resulting in data loss during personnel turnover.

To address these challenges, DoD began partnering with other federal agencies (i.e., U.S. Fish and Wildlife Service, Bureau of Land Management, U.S. Forest Service) in the development of the Avian Knowledge Network (AKN) in 2016. The AKN is a national clearinghouse for avian data and decision support tool for assessing bird population health, status and trends, specific stressors, and conservation measures. The AKN connects partner datasets, includes metadata and data assumptions, contains powerful data analysis tools, and is a permanent archive of all data records.

This office fully endorses the use of AKN and requests that each DoD Component utilize AKN to the maximum extent practicable and provide staff the support needed to make AKN the best tool for DoD. A coordinated and comprehensive approach to implement DoD's participation in the AKN will directly support the military mission and improve the quality and effectiveness of bird conservation on DoD installations. For DoD to fully employ the power of AKN, user training and significant initial data management is required. This office, through the DoD Legacy Resource Management Program, is committed to providing baseline support and resources to help implement AKN. This support will provide training and education for personnel, and technical assistance related to system use and data management. The DoD AKN Director is Ms. Elizabeth Neipert, at elizabeth.s.neipert@erdc.dren.mil or 907-201-6244.

Additionally, a national Cooperative Agreement has been established to support AKN implementation. It provides a streamlined process for DoD Components and installations to contribute additional resources to meet their unique needs.

The point of contact for this office is Ms. Liz Galli-Noble, DoD Senior Natural Resources Program Manager and Legacy Resource Management Program Manager, elizabeth.j.galli-noble.civ@mail.mil or 406-581-8148

DoW & AKN

WHY?

DOW DATA ISSUES

- (1) Inconsistent formats and inefficient access to data for regulatory requirements, environmental analyses, planning and research
- (2) Lack of visibility on avian species population trends and management across the Military Services and broader landscapes, resulting in difficulty applying decision-making
- (3) Lack of a centralized, secure data repository resulting in dispersed datasets and data loss during personnel turnover

DoW AKN Program

Task Categories

Training

Ex. quarterly regional, service-specific, NMFWA, training videos

DoW-Specific Resources

Ex. user guides, DoW AKN Portal, data visualization and query tools

Data Initiatives

Ex. new data type incorporation, integration with partner data, data standardization

AKN Tools

Ex. new AKN roles, advanced analysis and query functionality, cohesive U.I., Program Enterprise

Ongoing Base Support

Ex. project coordination, customer data support, back-end technical support

Driving Avian Data Questions

1. What species have confirmed occurrence on my installation?
2. What species have the potential to occur on my installation?
3. What species may occur/persist on my installation in the future?
4. How are species “doing” (population metrics) on my installation? (AKA “is my INRMP effective?”)
How are species doing across the military? (AKA “Is the DoW conservation program effective?”)
5. What factors are driving population trends on my installation? Are there conservation measures/actions within my INRMP that are working more than others to reach identified conservation objectives?
6. What is the relative conservation responsibility of avian species on military installations?

AKN PROTOCOLS

A Survey Protocol for Pinyon Jay Road-based Point Count Surveys

Version 1, March 2023

The road-based survey is a useful method of surveying for Pinyon Jays under certain circumstances and can be used in conjunction with or as an alternative to the Pinyon Jay Working Group (PJWG) pedestrian-based area search survey protocol (Boone et al. 2023; <https://partnersinflight.org/resources/pinyon-jay-working-group/>). Table 1 compares the two protocols.

The PJWG protocol consists of pedestrian surveys of 2.5 x 2.5 km blocks. That method is useful for discrete survey areas known or suspected to have Pinyon Jays, surveys with adequate personnel and funding to complete the time-intensive pedestrian surveys, and areas where foot traffic is allowed.

In some situations, however, road-based surveys may be more appropriate than pedestrian surveys. For example, pedestrian surveys or multiple visits may not be feasible in areas where no information on Pinyon Jay presence exists; in extremely large, previously un-surveyed areas; when financial and personnel resources are limited; or where foot traffic is prohibited, such as some areas on DoD installations.

The key elements of the road-based protocol are:

- 1) Use of 5 x 5 km blocks as the primary survey units. For analysis consistent with 2.5 km surveys, 5 km blocks can be sub-divided into 2.5 km blocks ("plots" in the PJWG protocol).

The 5 km blocks (25 km²) are recommended because of the greater geographical coverage possible with road-based surveys. This block size is based on radio telemetry studies of Pinyon Jay flocks and approximates known breeding season home ranges. [Examples include: 43.05 km² (including two colonies of 16.67 km² and 26.38 km²) (Johnson et al. 2014); 25.51 km² (Johnson et al. 2014); 26.99 km² (Novak 2019).] It is designed to reduce the possibility that a) a single flock moving over its home range will be counted two or more times, and b) more than one flock will be counted as a single flock (resulting in undercounts in a survey block that is too large). Either double-counting or under-counting is undesirable for a species of conservation concern, where accurate population estimates, trends, and occupancy are necessary for conservation and management. Road-based sampling can cover a block rapidly, before a flock can move into a neighboring block, potentially reducing both types of errors.
- 2) Delineation of survey routes along selected roads within the blocks (Figure 1). Blocks must include enough accessible road length to allow at least three point-count stops. If blocks will be subdivided into 2.5 km blocks for analysis, it is desirable to include at least three point-count stops in each 2.5 km block analyzed. However, this may not be possible

MANAGING PROJECT METADATA

EXERCISE 1: CREATE SAMPLING UNITS

CREATE SAMPLING UNITS

EXERCISE 1

Purpose: Learn how to create a sampling unit hierarchy within a project to support a point count survey

Goal: Create a new point count transect with one point under your service branch's Study Area (e.g., Army) in the "DOD_DEMO" Project

Project: DOD_DEMO

CREATE SAMPLING UNITS

EXERCISE 1

Reminder about Study Areas: In the project DOD_DEMO, your STUDY AREA is your service branch. The name is listed first, followed by the short name in parentheses.

For example, this Study Area Name is Air Force, and the Study Area Short Name is AIRFORCE

CREATE SAMPLING UNITS

EXERCISE 1

Exercise 1 instructions

CREATE SAMPLING UNITS

EXERCISE 1 *(THINKING AHEAD)*

- Consider how you might organize your data
 - Study Areas can be based on survey type rather than geography:
 - Ex- Study Area 1: multi-species point counts
 - Ex- Study Area 2: burrowing owl surveys
 - Only group points together in the same transect if they are part of the same survey (geographically grouped and collected on the same day)
 - Consider how you might name your study locations based on geographic features and numbers. (e.g., Emerald Hills 1, Alpha Maneuver Area 3)
 - Remember the hierarchy for point counts is
Study Area → Transect → Point(s)
- We will be building on this exercise later! Think about how your naming strategy can scale as you add surveys and points.

LONG NAME VS SHORT NAME: WHAT'S THE DIFFERENCE?

- Every sampling unit has a **Short Name** and a **Long Name**
 - Short Names and Long Names can be the same
- **Short Name + Long Name** combinations must be unique within an AKN Project
 - e.g., transect names and point count names **CAN NOT BE THE SAME**
- **Short Names** will be seen throughout the tools and in your data download
 - It is the shorthand name for each sampling unit
- **Short Names** are limited to 12 characters
- **Long Names** can be longer and more descriptive, if useful

LONG NAME VS SHORT NAME: WHAT'S THE DIFFERENCE?

EXAMPLES (any of these would be correct):

Point Count Transect Long Name	Point Count Transect Short Name
East Training Area	ETA
East Training Area 1	ETA-1
ETA	ETA
ETA-1	ETA-1

DOWNLOAD SAMPLING UNITS DEMONSTRATION

Download sampling units:

- [Project Leaders](#) for download sampling unit locations to GPS, GIS and more

MANAGING A PROJECT: RESEARCHERS

RESEARCHERS

People identified in a Project for getting access and/or who made observations

Created by user registration (for active users) or manual entry (for historical data)

RESEARCHER TYPES

Project Leader: the data owner, has full control over data, metadata, and who gets Project access

Biologist: can enter and review data in the Project

RESEARCHERS & PROJECT ACCESS

Project access assigned by Project Leader

Jane: Project Leader
Mike: Biologist
Pat: Biologist

Zac: Project Leader
Meg: Project Leader
Kim: Biologist
Pat: Biologist

RESEARCHERS & PROJECT ACCESS

DoW also has a Program Leader (Program = group of many Projects)
(managed by Point Blue staff w/ guidance from DoD leadership)

ADDING RESEARCHERS DEMONSTRATION

Tools:

- [Project Leader](#) for adding researchers to Project

MANAGING OBSERVATION DATA

EXERCISE 2: ENTER & PROOF POINT COUNT EVENT

ENTER & PROOF POINT COUNT EVENT

EXERCISE 2

Purpose: Learn how to enter survey data and site conditions in Biologists and proof those data

Goal: Enter the sample data for the sampling unit you created in Exercise 1, save it, and proof those data

ENTER & PROOF POINT COUNT EVENT EXERCISE 2

Exercise 2 instructions

ENTER & PROOF POINT COUNT EVENT

EXERCISE 2 *(THINKING AHEAD)*

- Data marked Clean through proofing will load into the data warehouse, making it available to analysis tools
- As Project Leader, you will:
 - Grant users who collect data access to Biologists to enter and proof their own data
 - Add protocols to the project and manage sampling units

DOWNLOAD POINT COUNT OBSERVATION DATA FROM PROJECT DEMONSTRATION

BULK UPLOADING METADATA & OBSERVATION DATA INTO A PROJECT

BULK LOADING DATA

Loading spreadsheet data into the Project Database for loading Researchers, Sampling Units, and Observations (e.g., historic datasets)

Observations: Uses definition file to describe how your spreadsheet maps into AKN

BATCH PROCESSING

Bulk Uploader v2 - Beta

Follow the steps below to load data in bulk into your project.

First, select the Project you want to bulk load into

FORT_HOOD - (IDOD_ARMY) Fort Hood

Next, select the Tool you want to use

Each tool independently does a task that helps you bulk load data into your project. Many of the tools process data in Batch, processing data in batches. Batch results can be found in the Batches tool.

[Add Researchers](#)[Add Sampling Units](#)[Add Observations](#)[Add Protocol](#)[Batch](#)

Results:

Batches for project FORT_HOOD

The table is showing all batches for this project. Click on a row to get the batch result details when Status is success or error.

Save as CSV Refresh list

ID	Utility	Status	Status Detail	Submitted	Created	Download

BULK UPLOADING PROJECT DATA

EXERCISE 3: BULK UPLOADING SAMPLING UNITS

BULK UPLOADING SAMPLING UNITS

EXERCISE 3

Purpose: Build on Exercise 1 using the Bulk Upload tool to create multiple sampling units at once for a given survey type

Goal: Bulk upload a new point onto your existing transect and add a new transect with three points

BULK UPLOADING SAMPLING UNITS

EXERCISE 3

Tip: Go back to Project Leader (Sampling Units-> Create and Manage) and take a look at the sampling unit you already created in Exercise 1. In this exercise, we'll create a new point under the existing transect, plus add a new transect with new points.

After Exercise 1:

- ▼ ○ ★ DOD_DEMO - DoD Demonstration Project
 - # Air Force (AIRFORCE)
 - # Army (ARMY)
 - ▶ ○ # CAMASNWR (CAMASNWR)
 - # Field Exercise (FIELD)
 - # Marine Corps (MARINES)
 - # National Guard (GUARD)
 - ▼ ○ # Navy (NAVY)
 - ▼ ● # CRG (CRG)
 - ● CRG1 (CRG1)
 - # Other Service Branch (OTHER)

Study Area: Navy
Point Count Transect: CRG
Point Count Point: CRG1

After Exercise 3:

- # Air Force (AIRFORCE)
- # Army (ARMY)
- ▶ ○ # CAMASNWR (CAMASNWR)
- # Field Exercise (FIELD)
- # Marine Corps (MARINES)
- # National Guard (GUARD)
- ▼ ○ # Navy (NAVY)
 - ▼ ○ # CRG (CRG)
 - ● CRG1 (CRG1)
 - ● CRG2 (CRG2)
 - ▼ ○ # CRGB (CRGB)
 - ● CRGB1 (CRGB1)
 - ● CRGB2 (CRGB2)
 - ● CRGB3 (CRGB3)
- # Other Service Branch (OTHER)

Make sure you are using the same Study Area (your service branch or affiliation) for Exercise 3!

In this example, the Study Area Name is Navy and the Study Area Short Name is NAVY

**2a. Create
Sampling Units**

WHERE?

East Training Area 1	ETA-1
ETA	ETA
ETA-1	ETA-1

BULK UPLOADING SAMPLING UNITS

EXERCISE 3

Exercise 3 instructions

BULK UPLOADING SAMPLING UNITS

EXERCISE 3 *(THINKING AHEAD)*

- The Bulk Uploader tool is useful when you have many sampling units to add to your project.
- The Bulk Uploader tool can add sampling units to an existing hierarchy or create an entirely new hierarchy *(remember our discussion thinking about Study Areas!)*
- The Bulk Uploader tool can also add Researchers or Observation data to your project
 - Note: we will not be covering those use cases today but can assist in office hours

EXAMPLE: FORT CARSON, CO

Project

Select a project or sampling unit within which you would like to add or edit a sampling unit.

AKN DATA SHARING LEVELS

WORKFLOW FOR MANAGING A PROJECT

MANAGING A PROJECT: DATA SHARING LEVELS

DATA SHARING LEVELS

Defines how visible each observation is for querying, summarizing, visualizing, and analyzing.

Controlled by the Project Leader within each Project

REVIEW LEVELS FOR EACH EVENT

Steps to enter and review data in preparation for sharing

**5. Assign Data
Sharing Levels**

DATA SHARING LEVELS FOR EACH EVENT

Choices informs the Point Blue Science Cloud tools of your intentions.

DATA SHARING AND TOOL ACCESS

Choices informs the Point Blue Science Cloud tools of your intentions.

**5. Assign Data
Sharing Levels**

DATA SHARING LEVEL MOTIVATION

- Organizational Policy
- Federal / State Law
- Research and Right of First Publication
- Threatened / Endangered Species
- Private Landowner Agreements
- Contribute to AKN Science
- Partnership / Collaboration Development

SETTING DATA SHARING LEVELS DEMONSTRATION

Tools:

- [Project Leaders](#) to set/edit sharing levels

EXAMPLE: USACE-WILLAMETTE VALLEY PROJECT, OR

- New biologist took DoW AKN training at NMFWA
- Worked with DoW AKN Team to ID data within boundary
- Data was both USACE and partner data
- Created USACE WVP within USACE enterprise
- Gained access to USACE-owned data
- Reaching out to partners about sharing data within boundary

AKN WAREHOUSE DATA 101

MANAGING A PROJECT: DATA WAREHOUSES

DATA WAREHOUSES

Database with homogenized copy of observation data, organized by sampling method for cross-project query and analysis

Enables data from **different Protocols** under the same data type (e.g., Point Count) to be aggregated

White-breasted Nuthatch, Williamsburg, VA; Credit: Paul Block

DATA WAREHOUSES

Raw Data – Differs by Protocol Fields

Stored in its full fidelity in your AKN Project Database

Warehouse Data – Homogenized Data, Comparable across Protocols

Stored in the Warehouse database

*Only **data you have access to** or that are shared at Level 5*

Public Data Download

PROJECT DATA VS. WAREHOUSE DATA

Point Count Data

Same: Species, Count, Protocol, Locations, Detection Cues, Observation Time, Data Sharing Levels

Differences: Binned Distance averaged, Comments missing, no Site Conditions, Observer Names to Initials, no Time Bin

CASE STUDY:

USFS REGION 8

- **30-year** USFS database with bird monitoring data across 34 national forests and 13 states was being **decommissioned**
- FS regional biologist wanted to save data and make sure current FS biologists could access it
- **1,121,654** point count observation records(**13,664** sampling locations) uploaded to AKN!
- **100+** FS biologists in Region 8 now have access to their data and continue to contribute new data every year
- Data used to create species distribution models, now being applied in multiple AKN decision support tools

Point Blue
Conservation
Science™

CASE STUDY:

SPECIES-CENTERED HABITAT MODELING

(Shirley et al 2013, Betts et al 2014,
Halstead et al 2019)

Compared to Land Cover Derived Models:

- High prediction ability
- Wider temporal range
- Avoid uncertainty:
 - misclassification of habitats
 - omission of fine-scale features
 - subtle changes in vegetation

DATA OWNERSHIP, SHARING, AND CONTRACTORS

DATA OWNERSHIP AND CONTROL

Project Leaders / Organizations are the owner of data from a Project, regardless of where it is stored

Project Leaders can change Data Sharing Levels at any time, including making more restrictive

PARTNERSHIPS AND CONTRACTORS

Partner / Contractors

- DoW collects data for a Partnership
- Hiring independent contractors for survey work

DoW

- Wants to ask questions across DoW
- Needs to manage and control all data on installations

We want data collected on/near DoW installations in DoW Projects

CONTRACTORS & TRAINING

MICHIGAN ARMY NATIONAL GUARD (MIARNG)

- Contracts Kalamazoo Nature Center (KNC) to complete bird surveys
- Wanted to train long-term staff to use AKN
- Attended training and entering data
- Additional benefit, KNC to enter other data, supplementing MIARNG data

>>Same story with AZGFD!

Primary Breeding Habitat⁴: Wetlands, Generalist

Population Information

Global Population³: 200,000

% Population Estimate USA³: Not yet available
Lower 95% Bound USA³: Not yet available
Upper 95% Bound USA³: Not yet available

Continental Population Trend⁴: Significant large increase

Regional Population Trend⁴: BCR19 - Significant large increase

% BCR Population³: BCR 19 - 0.00%
Lower 95% Bound BCR³: BCR 19 - null
Upper 95% Bound BCR³: BCR 19 - null

% State Population³: OK - 0.00%
Lower 95% Bound State³: OK - null
Upper 95% Bound State³: OK - null

Biology

Food Category²: Fish

Behavior Category²: Soaring (raptor)

Nesting Category²: Tree

Incubation Period²: 34 - 36 days

Clutch Size²: 1 - 3 eggs

Number of Broods²: 1

Egg description²: Dull white, usually without markings.

Egg length²: 5.8 - 8.4 cm

Conservation Status

Continental Importance⁴: Not yet available

Half Life⁴: Not yet available

Federally Threatened⁶: No

Federally Endangered⁶: No

State Threatened⁷: MA, CT, NH, NY, TX

State Endangered⁷: NJ, VT, CA

Migratory Bird Treaty Act⁸: Listed

Bird of Conservation Concern⁹: No

NAVIGATING THE R.A.I.L. TOOL DEMONSTRATION

Tools:

- [RAIL Tool](#)

EXERCISE 4: CREATE A SPECIES LIST WITH THE R.A.I.L. TOOL

CREATE A SPECIES LIST WITH THE R.A.I.L. TOOL

EXERCISE 4

Purpose: Get familiarized with the RAIL tool, which can help you find general information about the species in a particular area and their conservation status

Goal: Be comfortable navigating the RAIL tool to find information about species on your installation and understand the limitations of the tool

Thinking Ahead: Consider how RAIL might be helpful for your analyses and reporting

OFFICE OF THE ASSISTANT SECRETARY OF DEFENSE
 3400 DEFENSE PENTAGON
 WASHINGTON, DC 20301-3400

ENERGY, INSTALLATIONS,
 AND ENVIRONMENT

MEMORANDUM FOR DEPUTY ASSISTANT SECRETARY OF THE ARMY
 (ENVIRONMENT, SAFETY AND OCCUPATIONAL HEALTH)
 DEPUTY ASSISTANT SECRETARY OF THE NAVY
 (ENVIRONMENT AND MISSION READINESS)
 DEPUTY ASSISTANT SECRETARY OF THE AIR FORCE
 (ENVIRONMENT, SAFETY AND INFRASTRUCTURE)

SUBJECT: Department of Defense Avian Knowledge Network Program

The Department of Defense (DoD), like other federal agencies, has significant regulatory, management, and stewardship responsibilities related to migratory birds. These requirements are driven primarily by the Migratory Bird Treaty Act (MBTA), the "Military Readiness Rule" (50 CFR § 21.15, Authorization of take incidental to military readiness activities) and Executive Order (EO) 13186 "Responsibilities of Federal Agencies to Protect Migratory Birds." In accordance with EO 13186, DoD has also established a Memorandum of Understanding with the U.S. Fish and Wildlife Service outlining the management and stewardship activities DoD will implement for migratory bird conservation. All DoD natural resources conservation programs support DoD access to its land, air, and water resources for realistic military training and testing and to sustain the long-term ecological integrity of the resource base and the ecosystem services it provides, in accordance with the Sikes Act. Collecting data and information from ongoing surveys, inventories, and monitoring are essential to make informed management decisions, efficiently and effectively meet regulatory requirements (e.g., the MBTA, the Sikes Act), conduct environmental analyses, and support planning to adaptively manage migratory bird populations in the context of mission activities. As such, the DoD spends millions of dollars annually to collect these data.

However, even with the collection of large amounts of data, DoD faces significant challenges to fully utilize and optimize our avian data. These challenges include: (1) inefficient access to data for regulatory requirements, environmental analyses, and planning; (2) a lack of visibility on avian species population trends and management across the Military Services and broader landscapes; and (3) a lack of a centralized, secure data repository resulting in data loss during personnel turnover.

To address these challenges, DoD began partnering with other federal agencies (i.e., U.S. Fish and Wildlife Service, Bureau of Land Management, U.S. Forest Service) in the development of the Avian Knowledge Network (AKN) in 2016. The AKN is a national clearinghouse for avian data and decision support tool for assessing bird population health, status and trends, specific stressors, and conservation measures. The AKN connects partner datasets, includes metadata and data assumptions, contains powerful data analysis tools, and is a permanent archive of all data records.

This office fully endorses the use of AKN and requests that each DoD Component utilize AKN to the maximum extent practicable and provide staff the support needed to make AKN the best tool for DoD. A coordinated and comprehensive approach to implement DoD's participation in the AKN will directly support the military mission and improve the quality and effectiveness of bird conservation on DoD installations. For DoD to fully employ the power of AKN, user training and significant initial data management is required. This office, through the DoD Legacy Resource Management Program, is committed to providing baseline support and resources to help implement AKN. This support will provide training and education for personnel, and technical assistance related to system use and data management. The DoD AKN Director is Ms. Elizabeth Neipert, at elizabeth.s.neipert@erdc.dren.mil or 907-201-6244.

Additionally, a national Cooperative Agreement has been established to support AKN implementation. It provides a streamlined process for DoD Components and installations to contribute additional resources to meet their unique needs.

The point of contact for this office is Ms. Liz Galli-Noble, DoD Senior Natural Resources Program Manager and Legacy Resource Management Program Manager, elizabeth.j.galli-noble.civ@mail.mil or 406-581-8148

DoW AKN STRATEGIC APPROACH

- DoW AKN Program Management Plan
- Status of DoW Data
- Data Initiatives
- DoW-Specific and AKN-wide Tools
- Priority Tasks for FY26

DoW AKN Program

Task Categories

Training

Ex. quarterly regional, service-specific, NMFWA, training videos

DoW-Specific Resources

Ex. user guides, DoW AKN Portal, data visualization and query tools

Data Initiatives

Ex. new data type incorporation, integration with partner data, data standardization

AKN Tools

Ex. new AKN roles, advanced analysis and query functionality, cohesive U.I., Program Enterprise

Ongoing Base Support

Ex. project coordination, customer data support, back-end technical support

DOW MISSION BENEFITS

- Secure database to input/upload, curate, and manage DoW field data
- Empowers historical data
- Assess status of birds on/near installations
- Monitor trends at multiple scales
- Data sharing and integration with partners
- Advanced data analysis and visualization tools
- Access to data that contributes to more technically and scientifically sound INRMPs, NEPA environmental reviews, and ESA Section 7 Consultation
- Contributes directly to proactive conservation, monitoring and management of priority bird species

Enabling the Mission, Defending the Resources

MILITARY SERVICE ACTIONS

Department of Army

✓ Five-year Implementation Plan:

- Defines 100% compliance
- Establishes baseline
- Five-Year timeline
- Expands training
- Provides ongoing base support
- Development of Army leadership decision-support tools

MILITARY SERVICE PROGRESS

DOW TOOLS

Standardized Sampling Methods

- Survey DoW personnel to identify the most common bird monitoring questions
- Promote standardized data collection methods across DoW
- Provide appropriate protocol selection based on management or research needs

AKN RESOURCES

Standardized Sampling Methods

SPECIES CHECKLIST

Species checklists are a simple way to record both incidental and comprehensive observations of bird species observed on your installation that don't fit a traditionally structured survey (e.g., point counts, line transects, etc.).

CHRISTMAS BIRD COUNT

The Christmas Bird Count (CBC) is a citizen science project that involves counting birds in the Western Hemisphere. Click here to learn how to incorporate CBC data collected on your installation into your AKN Project here.

EBIRD CHECKLISTS

eBird is a powerful community science tool run by Cornell Lab of Ornithology that collects observational data from birders. Click here to learn how to incorporate eBird checklist data collected on your installation in your AKN Project.

POINT COUNT METHODS

Click here to learn about Point Count methodologies including their assumptions, typical use cases, and examples of commonly used methodologies and their AKN Protocols.

AREA SEARCH METHODS

Click here to learn about Area Search methodologies including their assumptions, typical use cases, and examples of commonly used methodologies and their AKN Protocols.

INSTALLATION ADVISEMENT

On-site/Virtual visits with installation biologists to discuss:

- field methodologies,
- survey objectives and management goals,
- advise on appropriate design

Tabularized observation data

SCOPE OF WORK LANGUAGE

for Contracts, Cooperative Agreements and Interagency Agreements

Issue: possession of and access to data collected by contractors, external partners

Solution: enter into DoW-owned AKN projects

Method: develop language and guidelines for DoW contracts and agreements

DoW AKN Guidance:

1. Avian Knowledge Network Data Sharing Guidelines
2. Describing Sampling Protocol Definition for AKN Compatible Projects
3. Sampling Protocol Definition Template
4. Describing Field Methods and Sampling Design
5. Creating AKN Compatible Sampling Units
6. Sampling Unit Bulk Upload Templates
7. AKN Data Access, Entry, and Analysis
8. Preparing Data to Submit for Bulk Uploading for AKN Compatible Projects

SCOPE OF WORK LANGUAGE

for Contracts, Cooperative Agreements and Interagency Agreements

*Leveraging Partnerships, Data and Technology Information
Revolutionize Avian Conservation and Management*

Statement of Work Language for Department of Defense Service Contracts, Grants, and Cooperative Agreements DRAFT – February 2023

Introduction

To improve quality, access, and usability of avian survey, monitoring, and research data collected for Department of Defense (DoD), contractors and cooperators collecting such data use the Avian Knowledge Network (AKN) to enter, proof, and deliver their data. Here we provide guidance for developing statement of work language for contracts and agreements to specify such use of the AKN by contractors and/or cooperators. Specifications may vary based on whether the DoD is acquiring data from a contractor via a service contract or from a cooperator via a grant or cooperative agreement. The DoD and AKN are also developing new capacities, including a Program Enterprise System and additional user access specifications that will influence how the DoD specifies AKN use in contracts, grants, and cooperative agreements.

Following are details to be included in the "Statement of Work" section of a service contract, grant, or cooperative agreement. There are multiple options for data access, project set-up, and data entry for users with AKN training or for contractors/cooperators who do not have AKN training but will need to submit their project data in AKN compatible formats.

Terms used in Statement of Work (SOW) language

AKN Project—Fundamental unit of organization for observation data within the AKN. Projects contain information about how (Protocols), who (Researchers and Users), where (Sampling Units), when (Sampling Events), and what (Sampling Event Observations) data are collected. For DoD, each installation has its own project.

Sampling Protocol Definition—Defines how the data were collected and how they are stored.

Contractor/Cooperator—Party within the agreement that is primarily responsible for data collection and data entry.

DoD Designee—Primary DoD point of contact for contract terms. Can also specify an DoD AKN staff member if AKN staff will be working with the Contractor/Cooperator.

Field Methods—Protocol for data collection in the field used by the Contractor/Cooperator.

User Roles—The AKN allows for multiple levels of access to enter, manage, and share data. AKN users are assigned a User Role associated with each AKN Project they have permission to access. Current User Roles include:

- **Biologist**—An AKN user assigned as a Biologist in an AKN Project can enter and proof data. Biologists can also review, edit, or correct previously entered data in any dataset housed within the AKN Project.
- **Project Leader**—In addition to all Biologist User Role capacities, AKN users assigned as a Project Leader in an AKN Project can assign Sampling Protocol Definitions to an AKN Project, manage the Sampling Units (areas, points, transects, etc), manage data, get full exports of the AKN Project data from the system, and manage the User Roles (Biologist or Project Leader) of other AKN users on the AKN Project. Project Leaders can also set the desired data sharing levels for data, which determines how the data will appear in the various tools in AKN.

Sampling Unit—Field location where research or a survey is conducted and samples (observations) are collected. Sampling units are arranged hierarchically within AKN Projects (e.g., point count points nested within a transect).

Sampling Units contain a location name and geometry that describes where it sits on the earth. All point, polygon and other geographic data are described in WGS-84 Latitude-Longitude (EPSG:4326) geographical coordinate system.

Sampling Event—Represents the survey itself with a unique combination of location, date and time, person/people, and the protocol employed.

Statement of Work Language

The statement of work should specify standards for 1) data ownership and access 2) selecting sampling methods and AKN Sampling Protocol Definition(s), 3) providing details about sampling locations, 4) formats for uploading data. A user with AKN training may engage with the AKN directly as part of each of these steps; however, options are provided below for each step that allow for a Contractor/Cooperator without AKN training to provide the information in a format that is easily uploaded into the AKN by a DoD Designee. Information provided must be fully described per the AKN Guidance documents referenced in each step below.

DATA OWNERSHIP: DoD must have permanent access to all data collected for the agreement.

- **SOW LANGUAGE:** DoD owns and will have permanent access to all data collected for the agreement. The observation data (not summarized data) must be entered into the AKN and approved by the appropriate Project Leader at the appropriate sharing level (see DoD AKN Guidance: AKN Data Access, Entry, and Analysis for sharing level definitions). Data may be shared with the Contractor/Cooperator following [DoD AKN Guidance: AKN Data Sharing Guidelines](#) with specifics outlined in an AKN Data Sharing Agreement [DoD Designee PROVIDES ATTACHMENT].

DATA COLLECTION: Specify whether DoD or the Contractor/Cooperator will choose the sampling methods

(CHECK ONE):

- ☐ DoD Designee will specify the sampling methods to be used and corresponding Sampling Protocol Definition.
 - **SOW LANGUAGE:** Contractor/Cooperator will use [FIELD METHOD WITH CITATION] with associated field forms [DoD Designee PROVIDES ATTACHMENT]. The data collected on field forms will conform to the metadata specified by the methodology and associated Sampling Protocol Definition provided at [DoD Designee provides AKN link].
- ☐ Contractor/Cooperator will specify the sampling methods to be used and corresponding Sampling Protocol Definition. (Only use this option if the Contractor/Cooperator knows there is a corresponding Sampling Protocol Definition in the AKN).
 - **SOW LANGUAGE:** Contractor/Cooperator will provide sampling methods with associated field forms and a link to the associated Sampling Protocol Definition here <https://data.gointlblue.org/science/biologists/pho/protocolsearch.php>. Instructions for describing metadata are provided in [DoD AKN Guidance: Describing Sampling Protocol Definitions](#) and instructions for providing sampling methods is provided in [DoD AKN Guidance: Describing Field Methods and Sampling Design](#).
- ☐ Contractor/Cooperator will specify sampling methods to be used that does not have a corresponding AKN Sampling Protocol Definition.

DoW AKN Guidance:

1. Avian Knowledge Network Data Sharing Guidelines
2. Describing Sampling Protocol Definition for AKN Compatible Projects
3. Sampling Protocol Definition Template
4. Describing Field Methods and Sampling Design
5. Creating AKN Compatible Sampling Units
6. Sampling Unit Bulk Upload Templates
7. AKN Data Access, Entry, and Analysis
8. Preparing Data to Submit for Bulk Uploading for AKN Compatible Projects

GUIDANCE TO HELP PROJECT MANAGERS DETERMINE ROLES FOR THEIR CONTRACTORS

AKN TOOLS

Enterprise Support for Programs

Need: Data curation, management, and analysis at multiple scales (e.g., field office, regional office, entire agency)

Solution: AKN-wide structure allowing multiple Project grouping via Programs.

Plan: Build new technology, to create/manage Programs, especially for query and download of project data

Status: In prototype phase

- I. Beta test of Program download tool
- II. Prototype of Program warehouse

Project Management Portal

Project Downloader

This tool allows you to download your observation data, sampling unit configurations, or both on a per-sampling unit, per-project basis. All projects that you have access to, including any in your program, will be available for selection. Once you click the download button, a zip file containing one CSV per selection will download from your browser.

Project

Select one or more projects or sampling units for data download.

Filter

☐ Select all projects

- ☐ ★ ABERDEEN_PROVING_GROUND - (DOD_ARMY) Aberdeen Proving Ground
- ☒ ★ ALTUS_AFB - (DOD_AIRFORCE) Altus AFB
- ☒ ★ ARNOLD_AFB - (DOD_AIRFORCE) Arnold AFB
- ☒ ★ AZ_ARNG - (DOD_NATGUARD) Arizona Army National Guard
- ☒ ★ BARKSDALE_AFB - Barksdale Air Force Base
- ☐ ★ BARRY_GOLDWATER_RANGE_EAST - (DOD_AIRFORCE) Barry M. Goldwater Range East
- ☒ ★ BARRY_GOLDWATER_RANGE_WEST - (DOD_MARINE) Barry M. Goldwater Range West

Observation data

If you would like to download observation data, select the type(s) of survey data to be included in the download.

Survey types
NOTE: If the survey data type is not available for any number of projects you've selected, those projects will not be included in the resulting download.

- ☐ Point count observations
- ☐ Area search observations
- ☐ Secretive marshbird observations
- ☐ Vegetation observations
- ☐ Site condition observations
- ☐ Linear transect observations
- ☐ Soil survey observations
- ☐ WIFL territory summaries
- ☐ Banding observations

Date filter
Select a date filter to limit observation data downloaded to those created within the specified range.

Start date Stop date

Sampling units

If you would like to download sampling units, select which file type(s) to include in the download.

- ☐ CSV
- ☐ KML
- ☐ Shapefile
- ☐ GPSU
- ☐ Waypoint

You must select at least one sampling unit or project

You must select at least one of either the observation data or sampling unit file types

Species	Survey Target**	Count #	Number Observed			Estimated Breeding Pairs	Estimate You Produced		
			Nests	Adults	Young				
*Status - Active = Breeding (nest building, courtship, incubation, eggs, or chicks observed) Inactive = Non-breeding (no active nests, eggs, or chicks)						**Survey Target - N = _____ p = _____			
Comments (other nesting species, predators, presence of banded birds):									
Colony Site Information									
State			County			General Location			
Nesting habitat ground, trees, manmade structure									
Land Ownership									

Sampling Protocol Definition(s)

CWB ATLANTIC FLYWAY

CWB ATLANTIC FLYWAY CONDITION

Colonial Waterbird Program Structure

**Program-based multi-scaled
data access, analysis, download & outputs**

Flexibility with data analysis

**Sharing controlled at the Project database (or
observation) level, can choose to share or not**

**Scaled conservation actions targeted
where most needed**

AKN TOOLS

More Flexible User Roles

Need: Roles in the system that meet requirements for data entry and/or analysis for portions of AKN projects

Solution: Creation of two new user roles that meet identified needs

Plan: Create two new roles

- I. **Contractor Role** - support a contractor requiring access (data entry, data download, data analysis) to a portion of Project
- II. **Analyst Role** - allow full access to a Project or Program for data download and analysis, w/o ability to manage metadata or user access.

Status: Needs and roles identified, Will begin upon completion of the Enterprise Support for Programs

Driving Avian Data Questions

1. What species have confirmed occurrence on my installation?
2. What species have the potential to occur on my installation?
3. What species may occur/persist on my installation in the future?
4. How are species “doing” (population metrics) on my installation? (AKA “is my INRMP effective?”)
How are species doing across the military? (AKA “Is the DoW conservation program effective?”)
5. What factors are driving population trends on my installation? Are there conservation measures/actions within my INRMP that are working more than others to reach identified conservation objectives?
6. What is the relative conservation responsibility of avian species on military installations?

FY26 PRIORITY TASKS

Base Support

- Program Coordination
- Installation Consulting (Office Hours)
- Back-end Technical Support
- Customer Data Support
- Reporting: Annual, Qtrly & Factsheets
- Annual Support Costs (Science Cloud)

Training

- Regional Training (4x/year)
- Service-specific Trainings (Army)
- Manager Training Modules
- Expanded Methodology Training
- Training Videos

AKN Tools (Partner Initiatives)

- Database-to-database API
- Creation of Contractor Role
- Creation of Analyst Role
- New Analyst Tool

Data Initiatives

- MSS Protocols & Data
- ARU-collected Data Model
- BASH Data in Science Cloud
- Banding Data in Science Cloud
- Decision-support Tools & Publications

DoW-Specific Tools

- Conservation Responsibility
- Management Program Update
- Standardizing DoW Bird Monitoring
- Mission-sensitive Species Tools
- Operations Sustainment Tool

Military Services & Installation Support

- Historical/Contemporary Data Support
- Custom Data Outputs
- Direct Data Initiatives
- Case Study Development

WHAT UPDATES, INITIATIVES, TOOLS DO YOU WANT TO SEE?

NEXT STEPS FOR YOU

Avian Knowledge Network

Leveraging Partnerships, Data and Technology to Revolutionize Avian Conservation and Management

Who We Are

The Avian Knowledge Network (AKN) is a partnership currently composed of federal and state agencies and non-governmental organizations who have shared priorities regarding informatics needs for biodiversity conservation and management. The AKN is a powerful and secure cloud computing system that government agencies, NGOs and others are using to enter, manage, analyze and share their avian observation data.

Office Hours: Project Set Up in the AKN

New Project Questionnaire

Name:

Installation:

Email Address:

- 1) Please provide a short summary of the scope of your project. What are the objectives/questions for your project?
- 2) What survey type do you conduct? (e.g., Point Count, Area Search, Line Transect, etc.)
- 3) **Sampling Units:** How are your surveys organized? How do you select your sampling locations? Briefly describe your study design.
 - a. If point counts, are they grouped into transects, or are all points independent?
Y or N
- 4) **Observation Protocol:** Describe your field methods. Do you have a written protocol or data dictionary? Y or N
 - a. Species
 - b. Length of survey
 - c. Time Bins
 - d. Distance—exact or binned?
 - e. Detection cues—do you record this? Y or N
 - If so, what detection cues do you use (e.g., call, song, visual, wing, etc.)?
 - If so, all types or just first detected?

Point Blue New User Registration

Thank you for registering!

We will be sending you an email momentarily asking you to confirm this registration

- Make sure that you can receive email from datasolutions@pointblue.org so that the message isn't blocked as spam.
- You should receive a confirmation email within a few minutes. If not, you should re-register, as your email address may have been typed incorrectly.
- If you do not receive your confirmation email after the second registration attempt, please send an email to support@pointbluehelp.zendesk.com with details of your registration.
- Use the link in that email to confirm your registration. Upon confirmation, an email will be sent to a project leader or system administrator approving your access to the system and any projects you've requested.

STEP 2: VERIFY ACCOUNT

 datasolutions@pointblue.org 13-03-202

Subject: Please confirm your registration with DOD_DEMO

Confirm Your Registration with DOD_DEMO

DOD_DEMO User Name: DoDTest@akn.org

Thank you for registering your account with DOD_DEMO

Before you are able to use your new account, you must click the link below to validate your e-mail address and complete your registration:

https://data.pointblue.org/apps/public/deju.php?p=NewuserConfirm&tt=__tmpr65f1ee1b28d6d&hs=YjQ0WnowTmNMVGZ3adc&deju_nextPage=nu-confirm

If you have any problems or questions, please contact us at support@pointblue.org
