- Parking lot items

DoD Mandate Memo

OFFICE OF THE ASSISTANT SECRETARY OF DEFENSE
3400 DEFENSE PENTAGON
WASHINGTON, DC 20301-3400

ENERGY, INSTALLATIONS, AND ENVIRONMENT

MEMORANDUM FOR DEPUTY ASSISTANT SECRETARY OF THE ARMY
(ENVIRONMENT, SAFETY AND OCCUPATIONAL HEALTH)
DEPUTY ASSISTANT SECRETARY OF THE NAVY
(ENVIRONMENT AND MISSION READINESS)
DEPUTY ASSISTANT SECRETARY OF THE AIR FORCE
(ENVIRONMENT, SAFETY AND INFRASTRUCTURE)

SUBJECT: Department of Defense Avian Knowledge Network Program

The Department of Defense (DoD), like other federal agencies, has significant regulatory, management, and stewardship responsibilities related to migratory birds. These requirements are driven primarily by the Migratory Bird Treaty Act (MBTA), the "Military Readiness Rule" (50 CFR § 21.15, Authorization of take incidental to military readiness activities) and Executive Order (EO) 13186 "Responsibilities of Federal Agencies to Protect Migratory Birds." In accordance with EO 13186, DoD has also established a Memorandum of Understanding with the U.S. Fish and Wildlife Service outlining the management and stewardship activities DoD will implement for migratory bird conservation. All DoD natural resources conservation programs support DoD access to its land, air, and water resources for realistic military training and testing and to sustain the long-term ecological integrity of the resource base and the ecosystem services it provides, in accordance with the Sikes Act. Collecting data and information from ongoing surveys, inventories, and monitoring are essential to make informed management decisions, efficiently and effectively meet regulatory requirements (e.g., the MBTA, the Sikes Act), conduct environmental analyses, and support planning to adaptively manage migratory bird populations in the context of mission activities. As such, the DoD spends millions of dollars annually to collect these data.

However, even with the collection of large amounts of data, DoD faces significant challenges to fully utilize and optimize our avian data. These challenges include: (1) inefficient access to data for regulatory requirements, environmental analyses, and planning; (2) a lack of visibility on avian species population trends and management across the Military Services and broader landscapes; and (3) a lack of a centralized, secure data repository resulting in data loss during personnel turnover.

To address these challenges, DoD began partnering with other federal agencies (i.e., U.S. Fish and Wildlife Service, Bureau of Land Management, U.S. Forest Service) in the development of the Avian Knowledge Network (AKN) in 2016. The AKN is a national clearinghouse for avian data and decision support tool for assessing bird population health, status and trends, specific stressors, and conservation measures. The AKN connects partner datasets, includes metadata and data assumptions, contains powerful data analysis tools, and is a permanent archive of all data records.

This office fully endorses the use of AKN and requests that each DoD Component utilize AKN to the maximum extent practicable and provide staff the support needed to make AKN the best tool for DoD. A coordinated and comprehensive approach to implement DoD's participation in the AKN will directly support the military mission and improve the quality and effectiveness of bird conservation on DoD installations. For DoD to fully employ the power of AKN, user training and significant initial data management is required. This office, through the DoD Legacy Resource Management Program, is committed to providing baseline support and resources to help implement AKN. This support will provide training and education for personnel, and technical assistance related to system use and data management. The DoD AKN Director is Ms. Elizabeth Neipert, at elizabeth.s.neipert@erdc.dren.mil or 907-201-6244.

Additionally, a national Cooperative Agreement has been established to support AKN implementation. It provides a streamlined process for DoD Components and installations to contribute additional resources to meet their unique needs.

The point of contact for this office is Ms. Liz Galli-Noble, DoD Senior Natural Resources Program Manager and Legacy Resource Management Program Manager, elizabeth.j.galli-noble.civ@mail.mil or 406-581-8148

Limitations and caveats

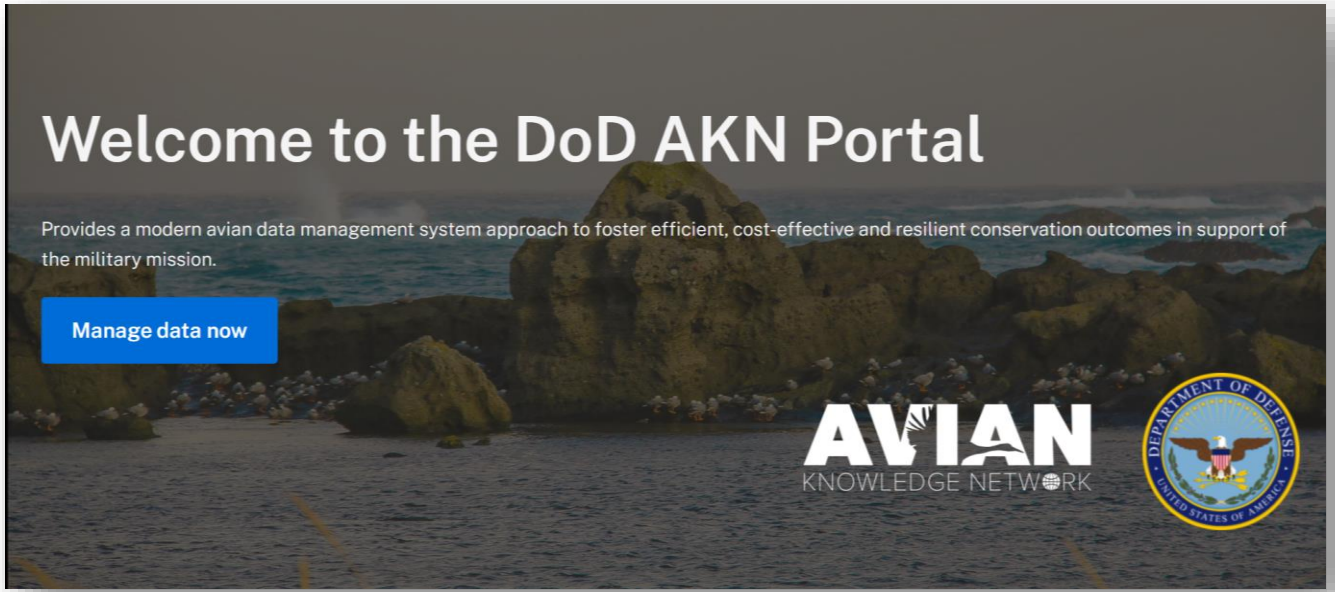
Focus today: Point Count data

Office hours are where we can dig deeply into your installation’s specific issues.

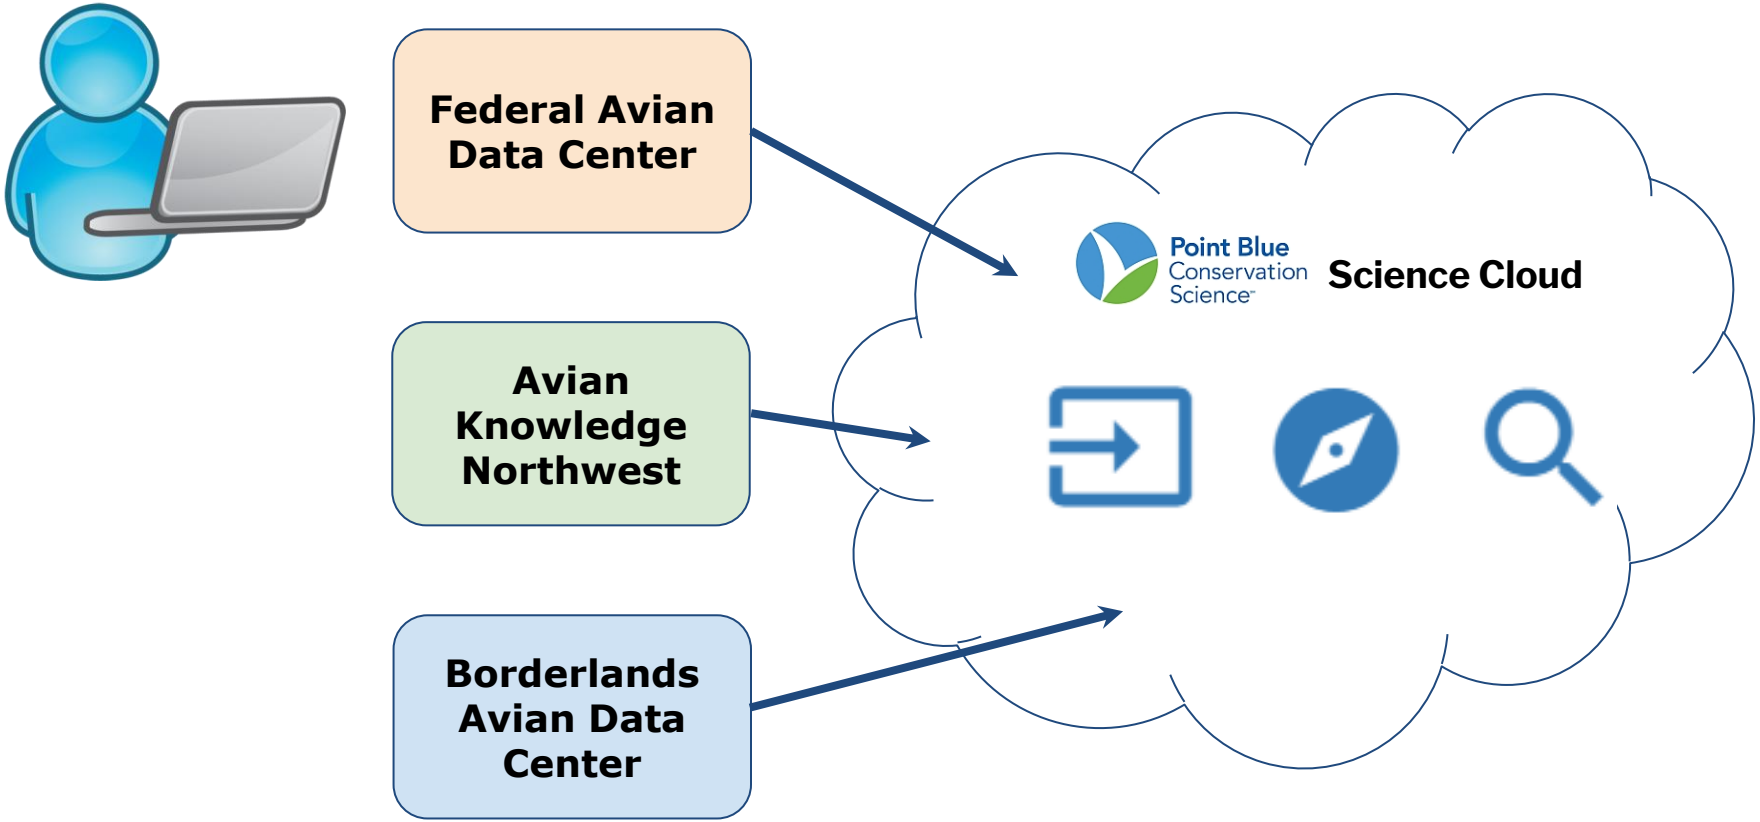
AKN Project Data 101

DoD AKN Portal

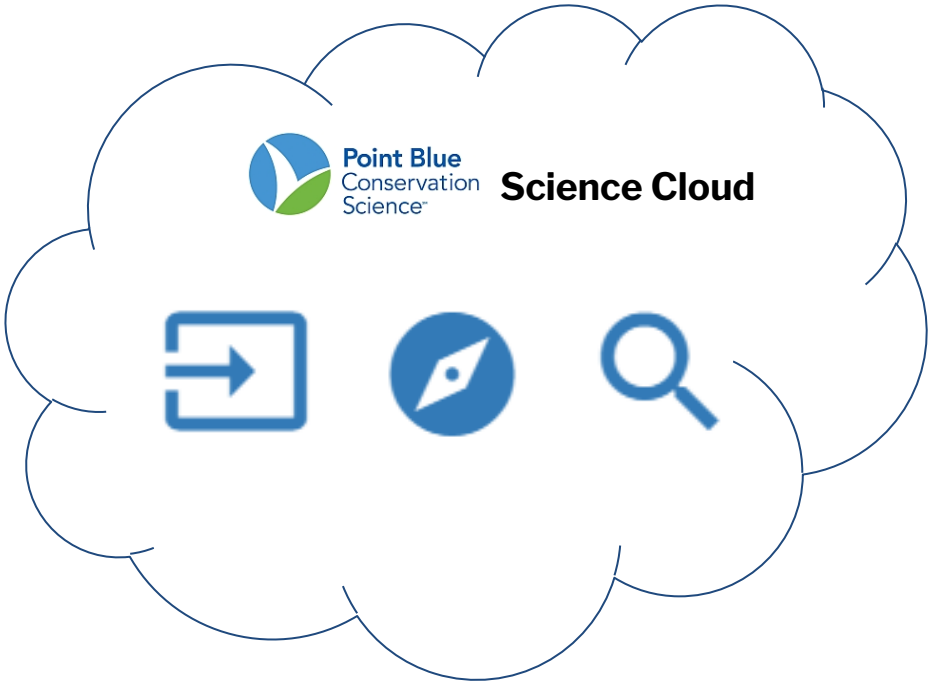
https://www.dodakn.org/



AKN: common cloud technology



Focus for this training



How do we represent protocol-based science?

How do you get data in?

How do you get your data & information out?

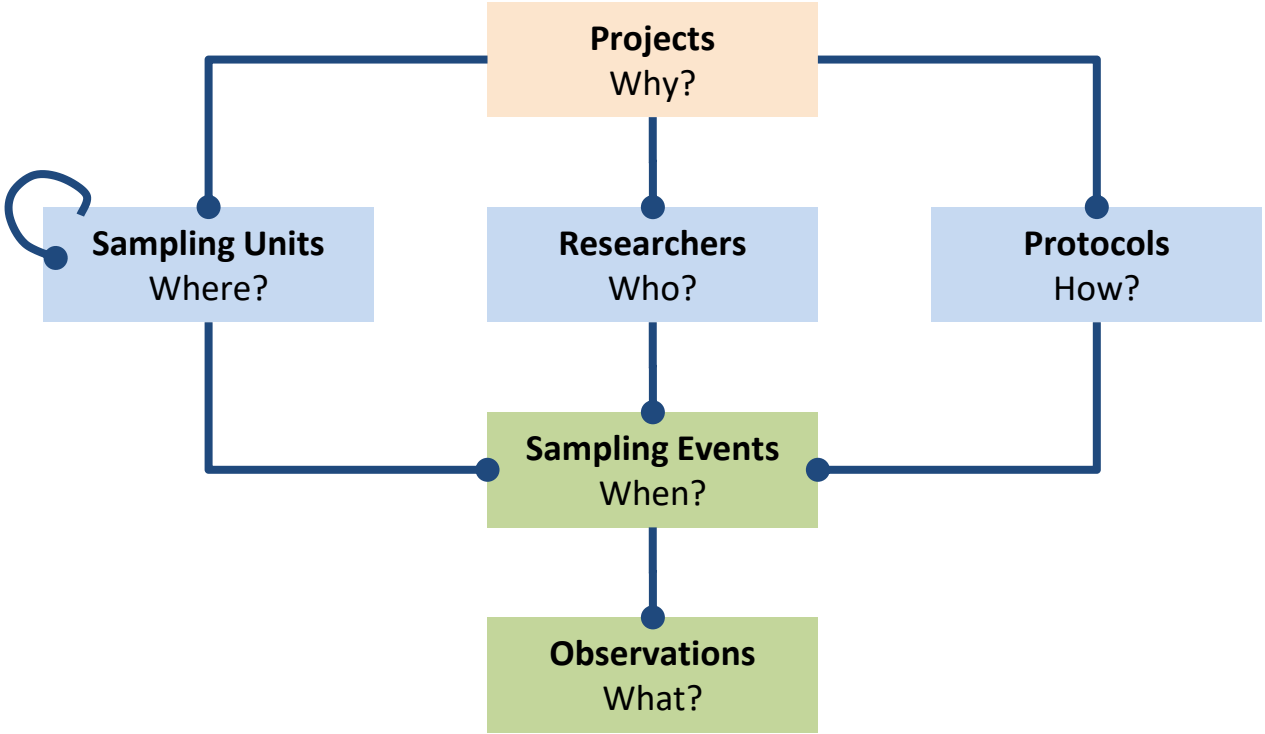
What conservation questions can you answer?

AKN Project Data 101

1. The parts of a Project Database

2. The workflow for creating a Project

The Project Database



Project

Container for Event and Observation data

Many ways to organize

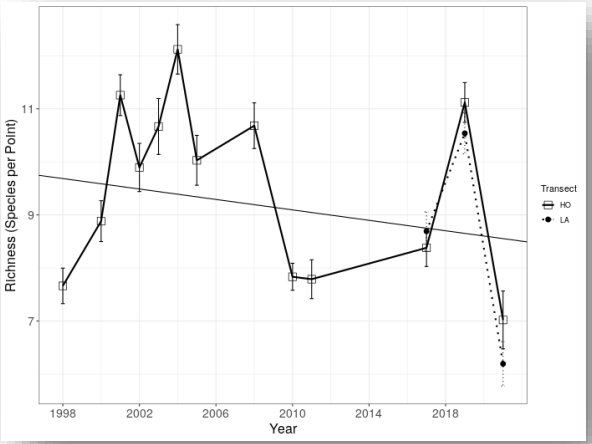
For DoD: Project = Installation

Projects
Why?

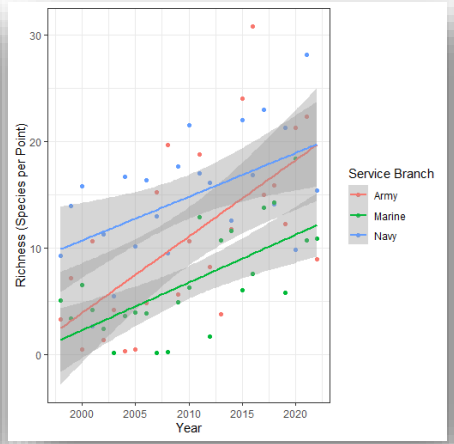
DoD Program Structure

- Air Force Subprogram
  - Installation Project Databases
- Army Subprogram
  - Installation Project Databases
- Navy Subprogram
  - Installation Project Databases
- Marine Subprogram
  - Installation Project Databases
- National Guard Subprogram
  - Installation Project Databases

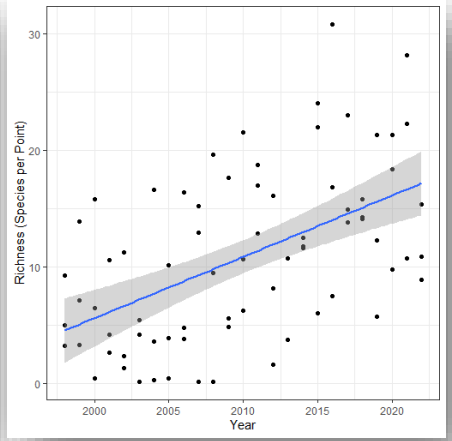
Vandenberg Space Force Base Project Riparian Richness



Service Branch Program Riparian Bird Richness



DoD Program Riparian Bird Richness



Protocols

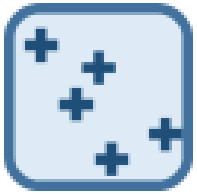
The *metadata* describing the methods and mechanics of how observations were collected

Should provide enough information for researcher 20 years from now to understand the methods you used

Protocols
How?

Primary Protocol Types

Area Search



Point Count

Linear Transect

Secretive Marshbird

Site Conditions

Protocols
How?

Point Count Protocols

Duration of survey at each point
Time (binned)
Distance (binned or exact), maximum
Detection codes
Can include **breeding behavior**
Assumed **exhaustive** survey
Each animal **counted once**

Point Count Protocol Examples

Compare how 3 field methodologies represented

Knutson (USFWS) protocol

Point Blue protocol

KBO protocol

Protocols
How?

Sampling Units

The locations where observations are collected

Organized into a tree (hierarchy)

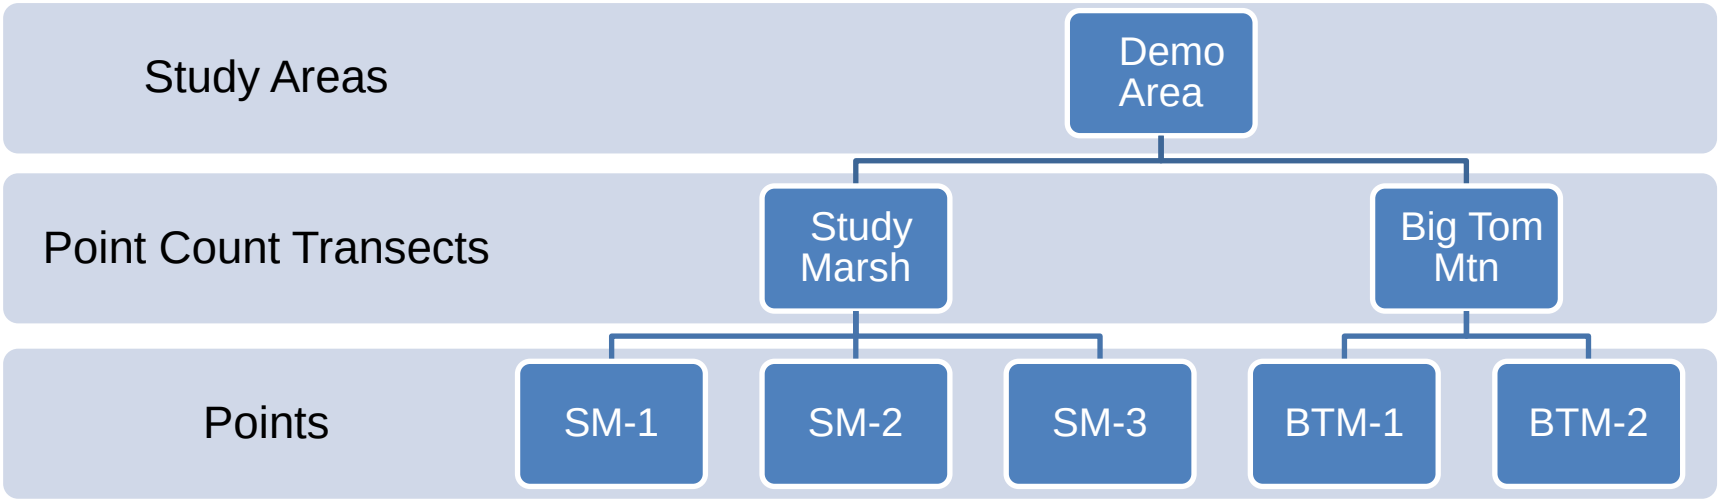
Uniquely named with Project

Can have Point/Line/Polygon

Sampling Units
Where?

Sampling Unit Types for Point Counts

Project: DOD_DEMO



Replicates or independent points?
What questions are you asking?

Sampling Units
Where?

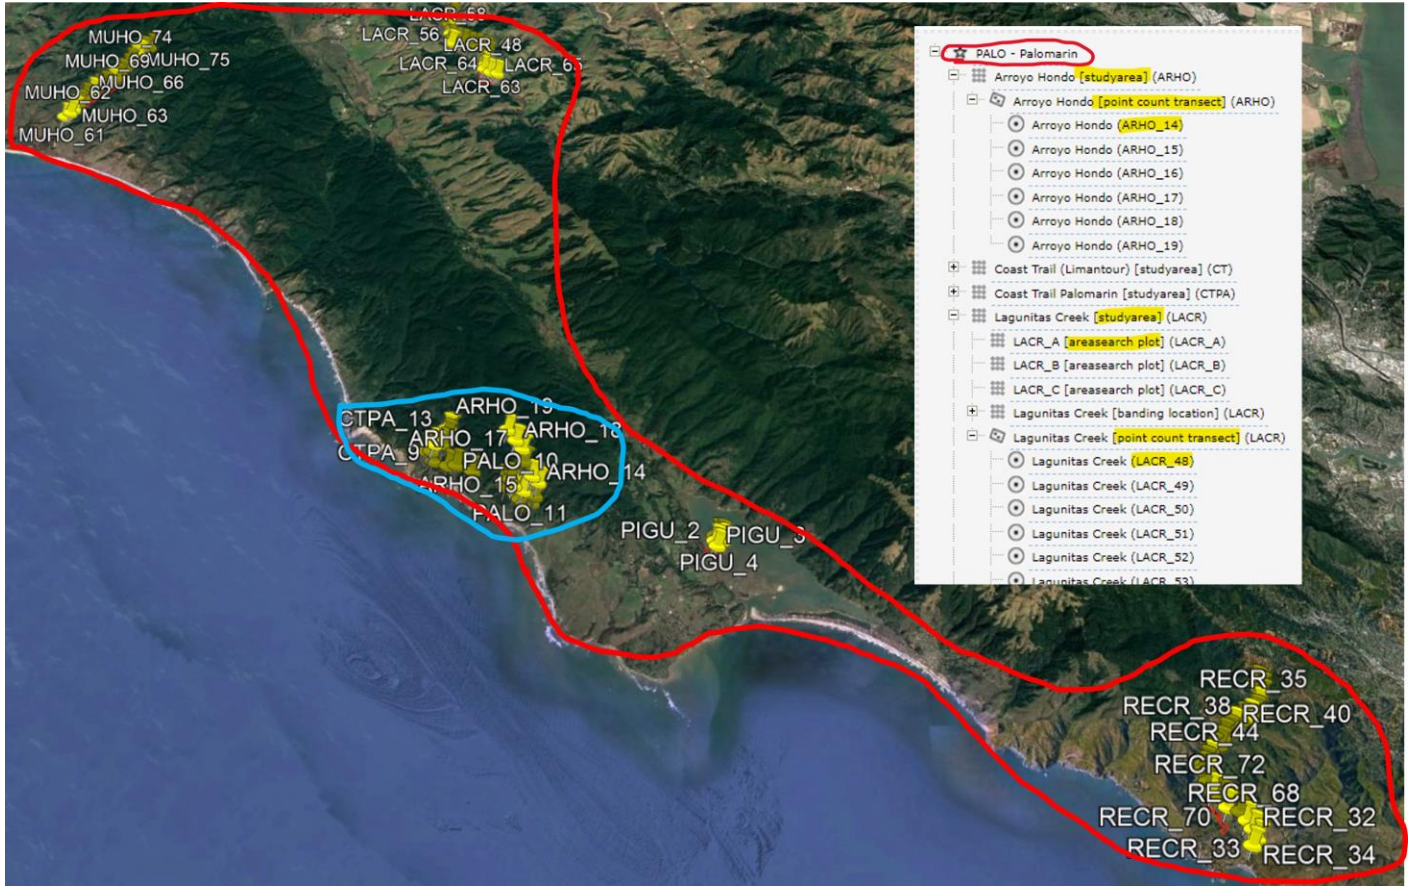
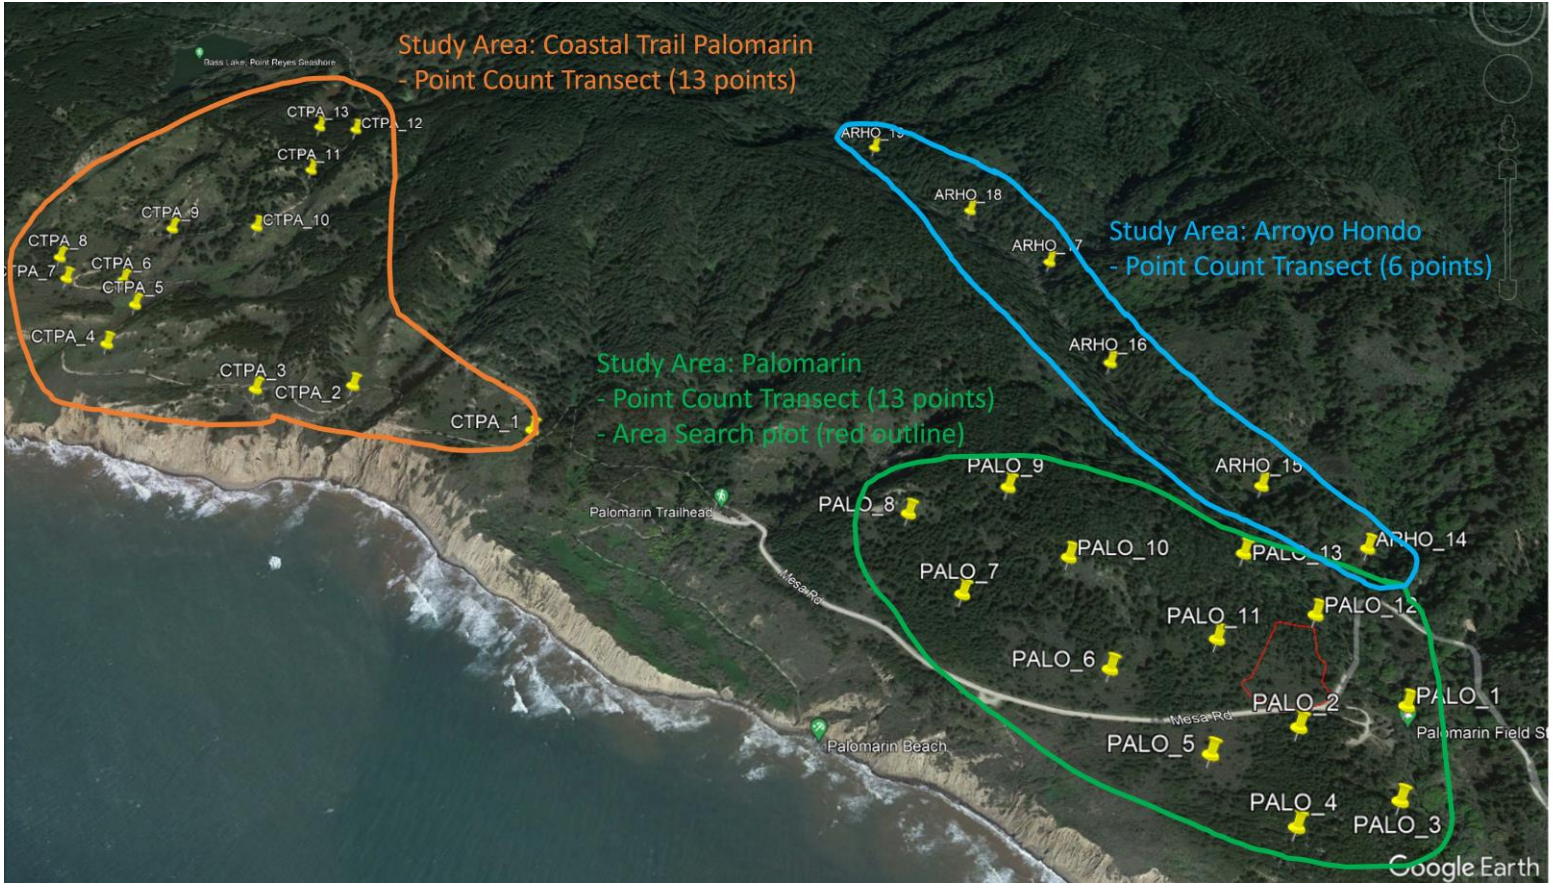
Replicates or independent points?
What questions are you asking?

Sampling Unit Types for Point Counts



Sampling Unit Types for Point Counts



Researchers

People identified in a Project for getting access and/or who made observations

Created by user registration (for active users) or manual entry (for historical data)

Researchers
Who?

Researcher Types

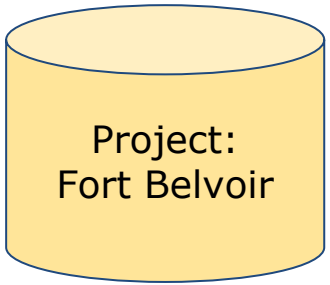
Project Leader: the data owner, has full control over data, metadata, and who gets Project access

Biologist: can enter and review data in the Project

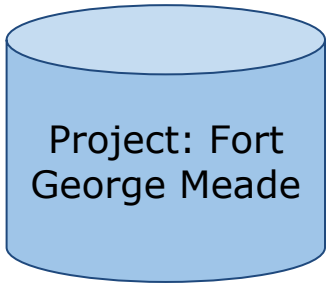
Researchers
Who?

Researchers & Project Access

Access Project assigned by Project Leader



Jane: Project Leader
Mike: Biologist
Pat: Biologist

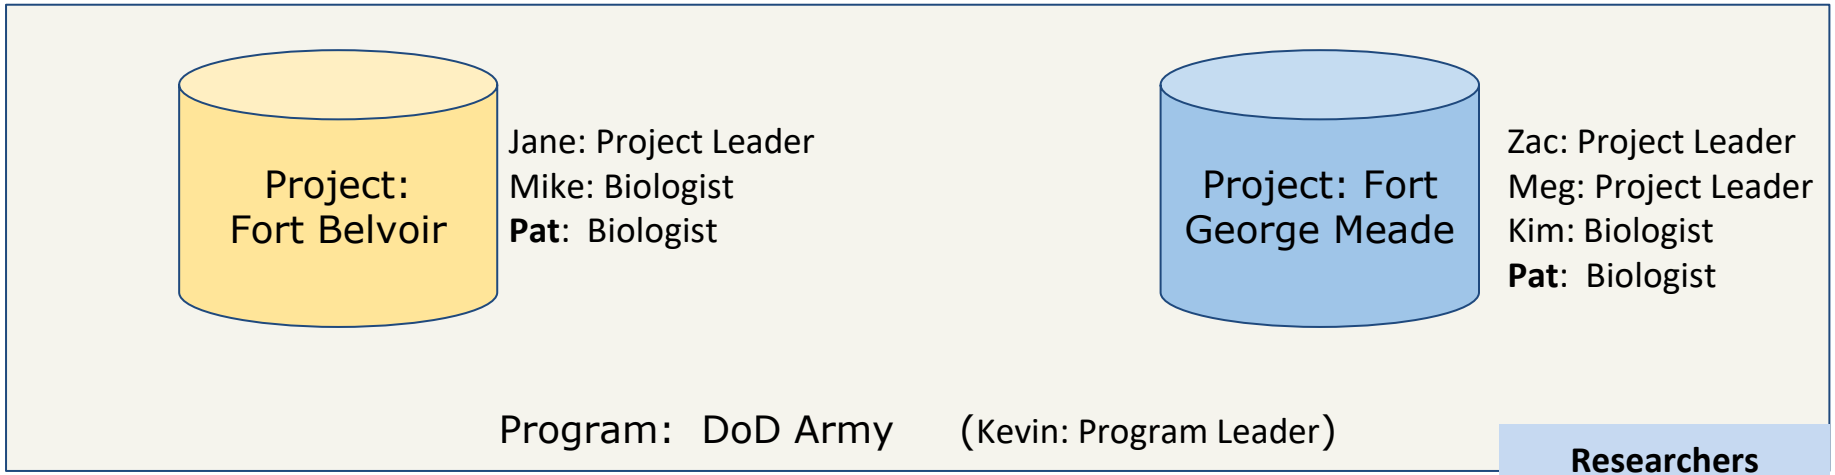


Zac: Project Leader
Meg: Project Leader
Kim: Biologist
Pat: Biologist

Researchers
Who?

Researchers & Project Access

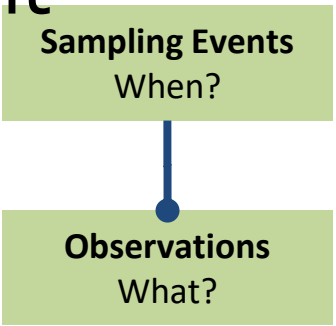
DoD will also have a Program Leader (managed by Point Blue staff w/ guidance from DoD leadership)



Sampling Events and Observations

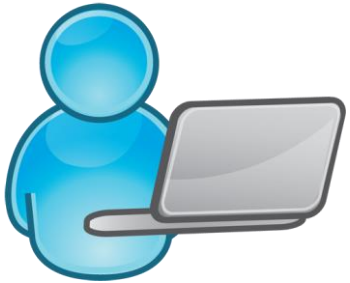
Event: survey at a Sampling Unit using a Protocol by Researcher at a specific date and time

Observation: one or more individuals of a single species detected during an Event



Review Levels for each Event

Steps to enter and review data in preparation for sharing



Project Biologist enters a new event and observations

Event is **RAW**

Data entered

Event is **CLEAN**

Data 1st review by Biologist

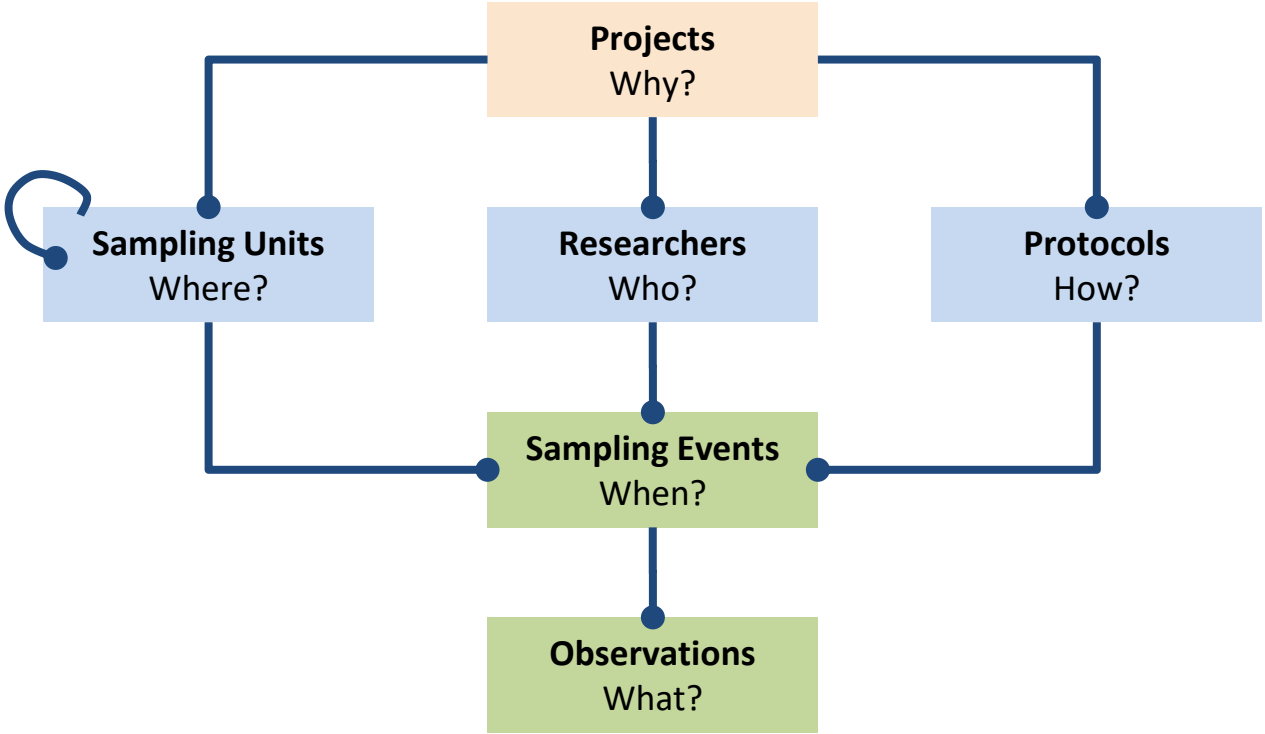
Event is **AVAILABLE**

Data final review

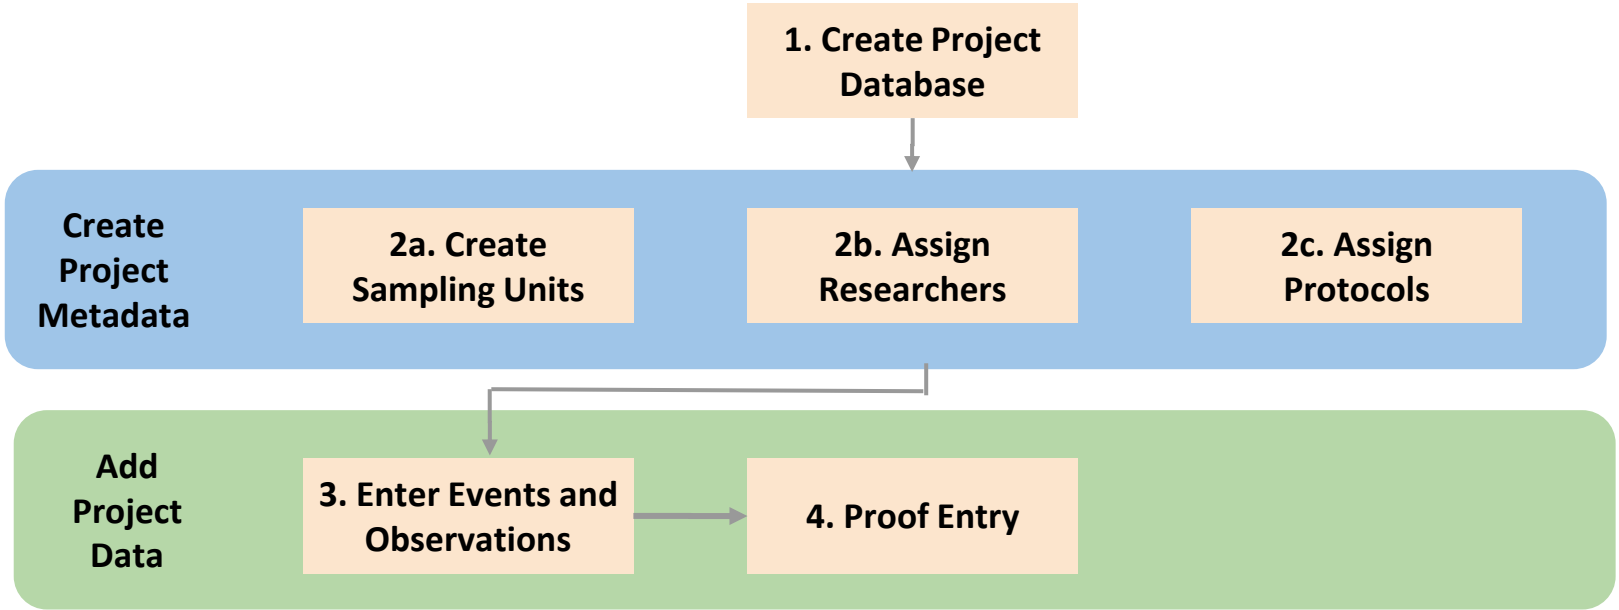
Event is **RESTRICTED**

Data final review and not to be shared

Questions on Project Database?



Workflow for Creating a Project



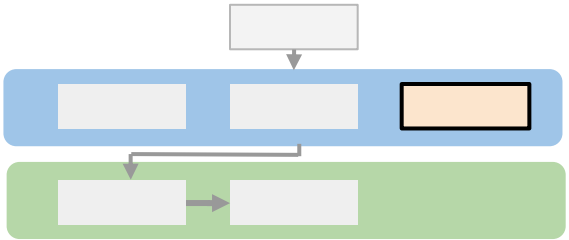
Creating Project Metadata

Choosing Protocols (demonstration)

Goal: select Point Count and Site Conditions protocols that match data sheet

Tools:

- Our data sheet
- Protocol search tool
- Biologists for adding protocol to project

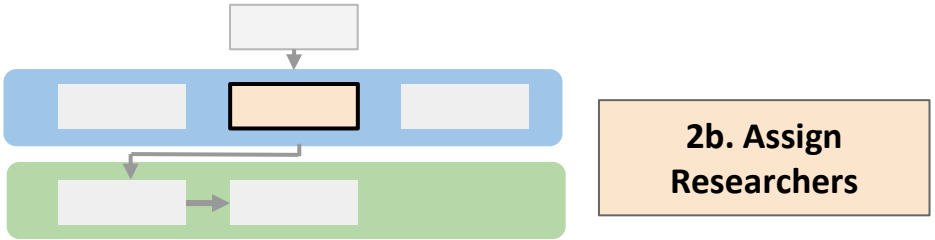


2c. Assign Protocols

Adding Researchers (demonstration)

Tools:

- Biologists for adding researchers to Project



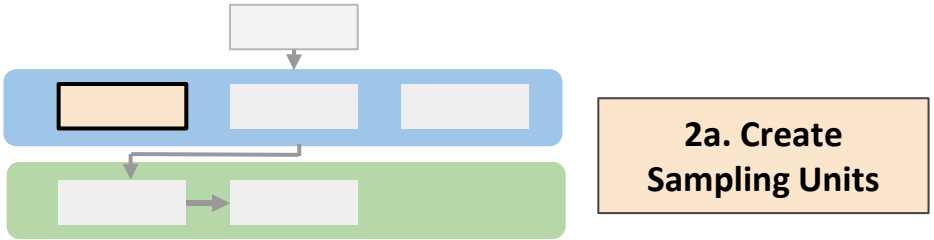
Create Sampling Units (Exercise 1 and demonstration)

Exercise:

- Exercise 1 instructions

Downloading the sampling units:

- Biologists for download locations to GPS, GIS and more



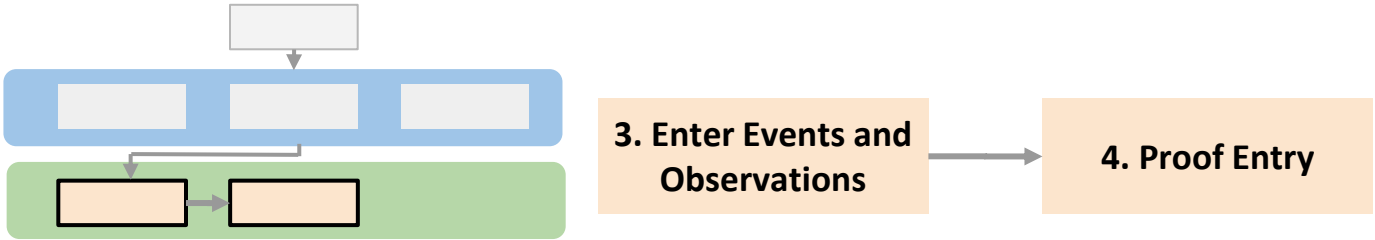
Break (15 mins)

Entering observation data to a Project

Enter & proof point count event (Exercise 2)

Exercise:

- Exercise 2 instructions
- okay not to follow data sheet exactly



Download Point Count Data from Project (demonstration)

Tools:

- Biologists for download observations from our Project

Bulk loading metadata & observation data into a Project

Bulk Loading Data

Loading spreadsheet data into the Project Database for loading Researchers, Sampling Units, and Observations

Observations: Uses definition file to describe how your spreadsheet maps into AKN

Batch Processing

AVIAN KNOWLEDGE NETWORK

Bulk Uploader V2 - Beta

Follow the steps below to load data in bulk into your project.

First, select the Project you want to bulk load into

FORT_HOOD - [DOD_ARMY] Fort Hood

Next, select the Tool you want to use

Each tool independently does a task that helps you bulk load data into your project. Many of the tools process data
results can be found in the Batches tool.

Add Researchers | Add Sampling Units | Add Observations | Add Protocol | Batches

Results:

Batches for project FORT_HOOD

The table is showing all batches for this project. Click on a row to get the batch result details when St

Save as CSV | Refresh list

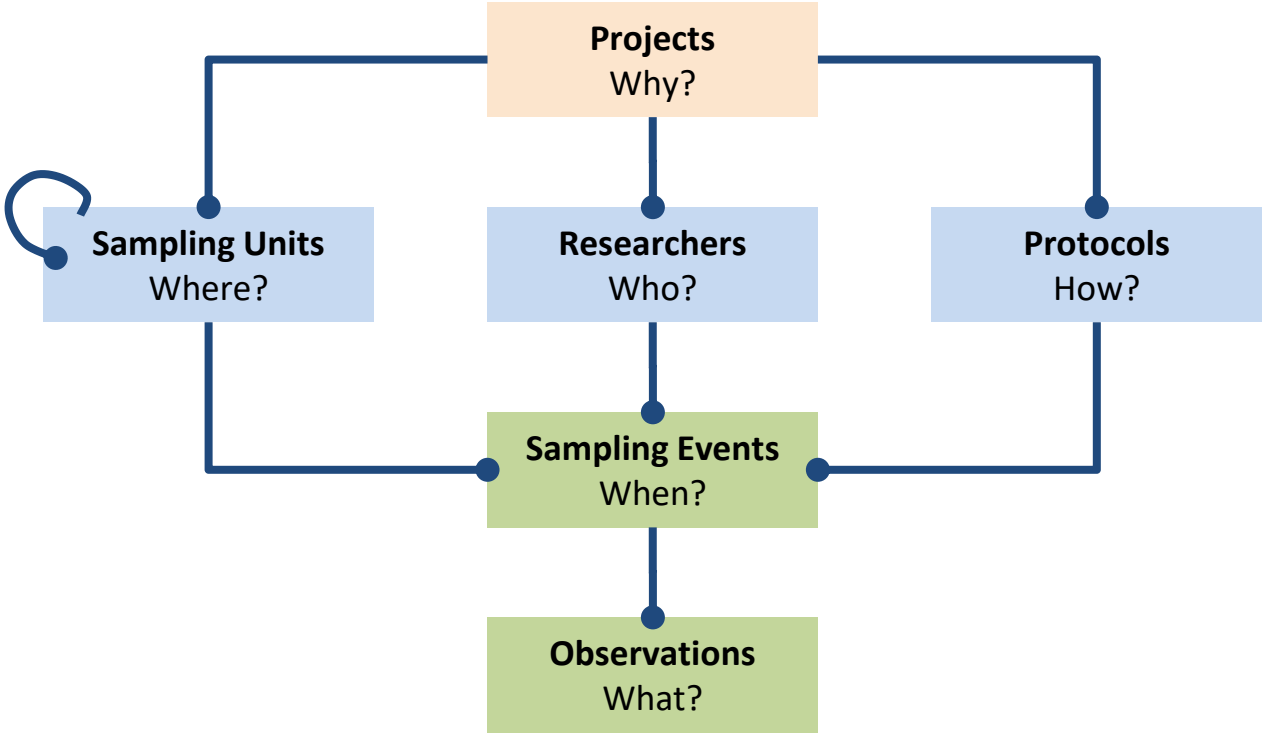
Demonstration of end-to-end process to register a new user

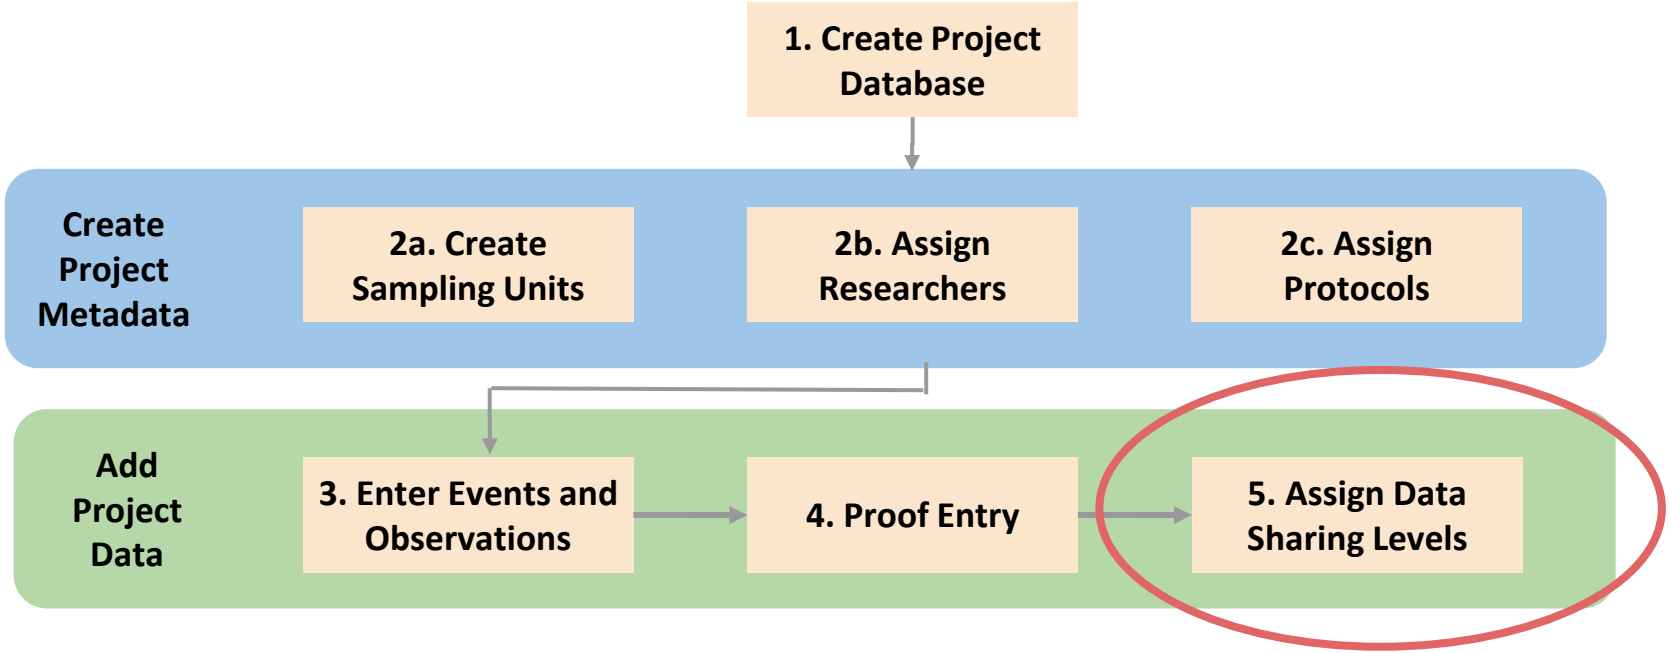
Lunch Break (60 min)

AKN Warehouse Data 101

The Project Database



Workflow for Creating a Project



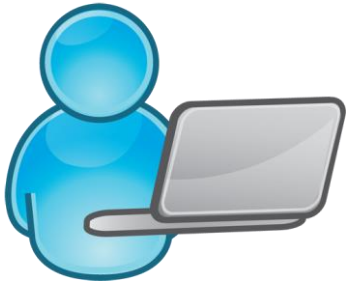
Data Sharing Levels

Defines how visible each observation is for querying, summarizing, visualizing, and analyzing.

Controlled by the Project Leader within each project

Review Levels for each Event

Steps to enter and review data in preparation for sharing



Project Biologist enters a new event and observations

Event is **RAW**

Data entered

Event is **CLEAN**

Data 1st review by Biologist

Event is **AVAILABLE**

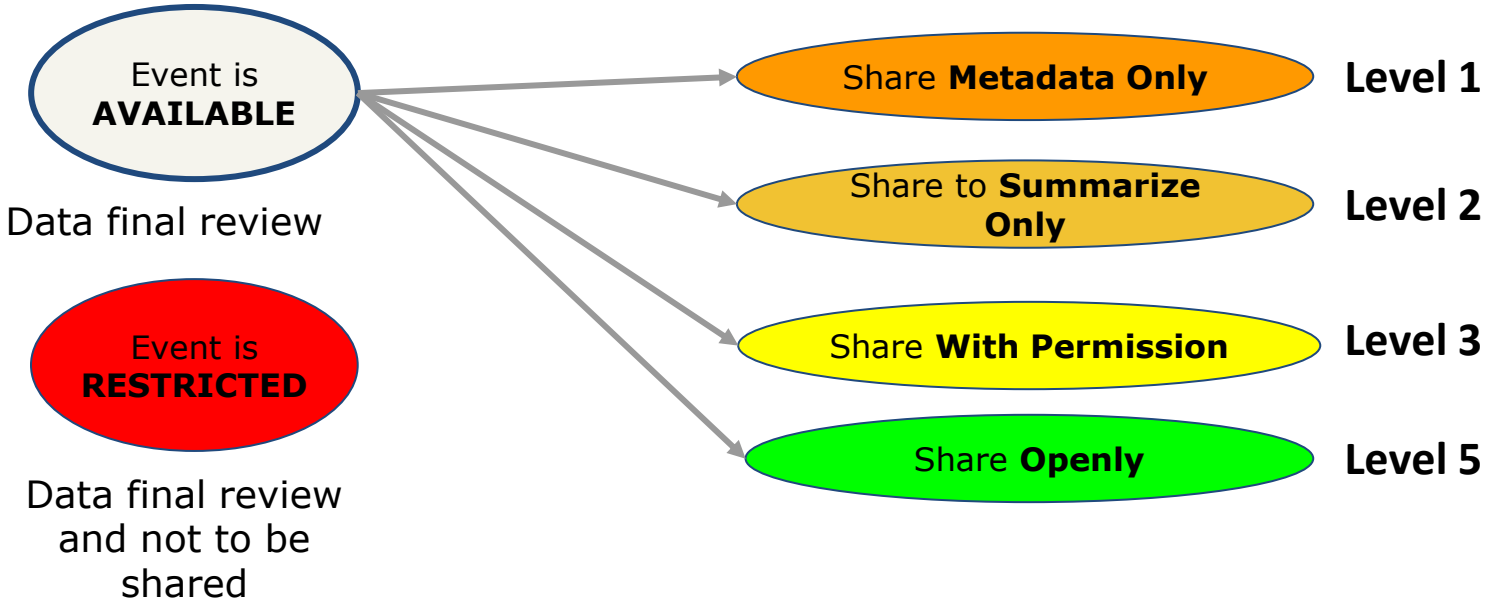
Data final review

Event is **RESTRICTED**

Data final review and not to be shared

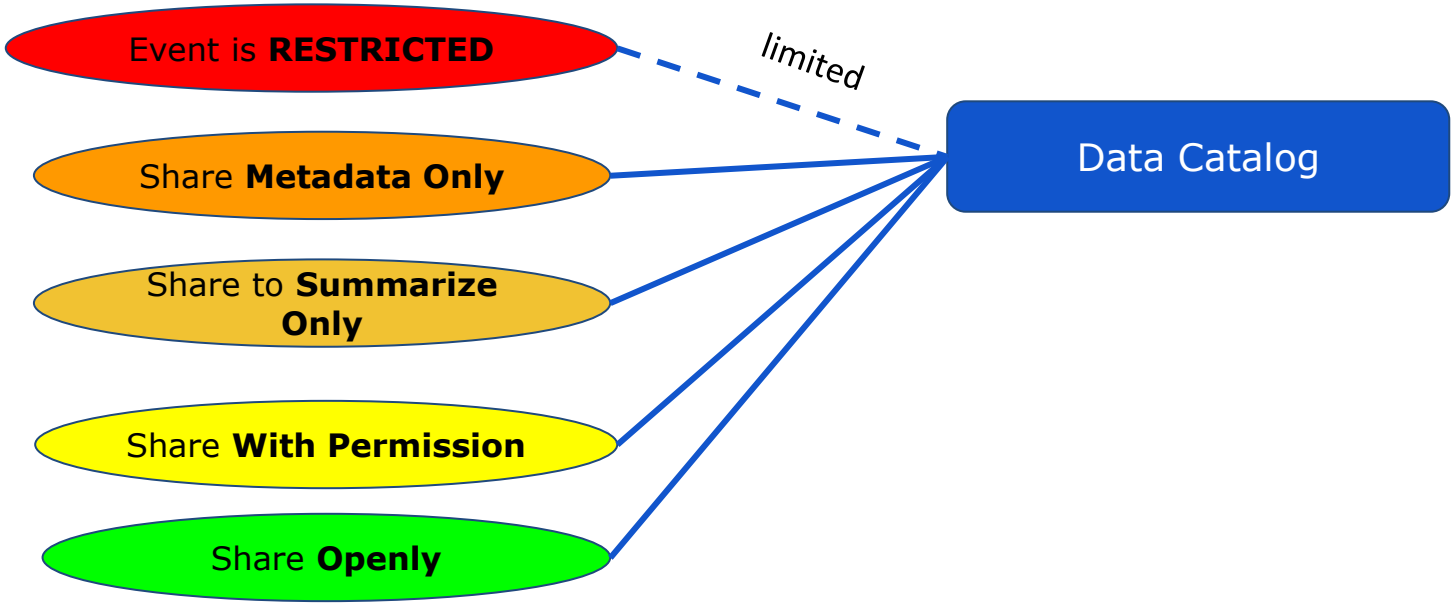
Data Sharing Levels for each Event

Choices informs the Point Blue Science Cloud tools of your intentions.



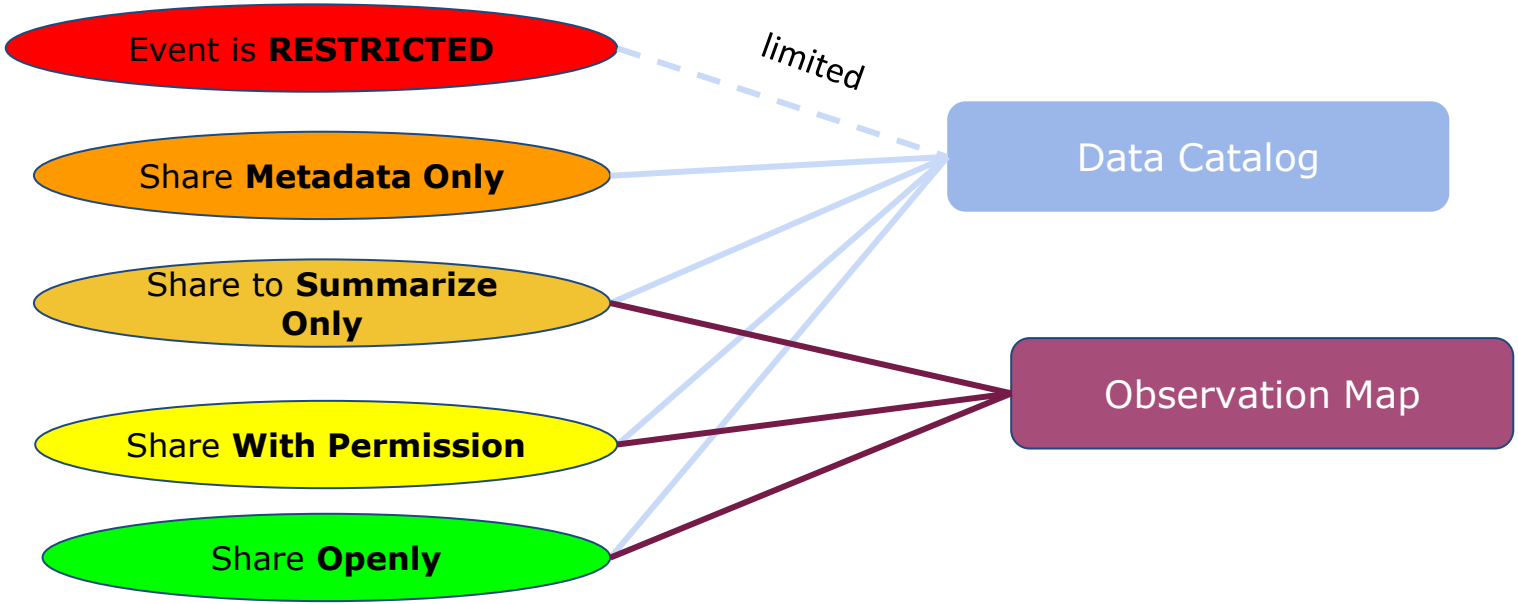
Data Sharing and Tool Access

Choices informs the Point Blue Science Cloud tools of your intentions.



Data Sharing and Tool Access

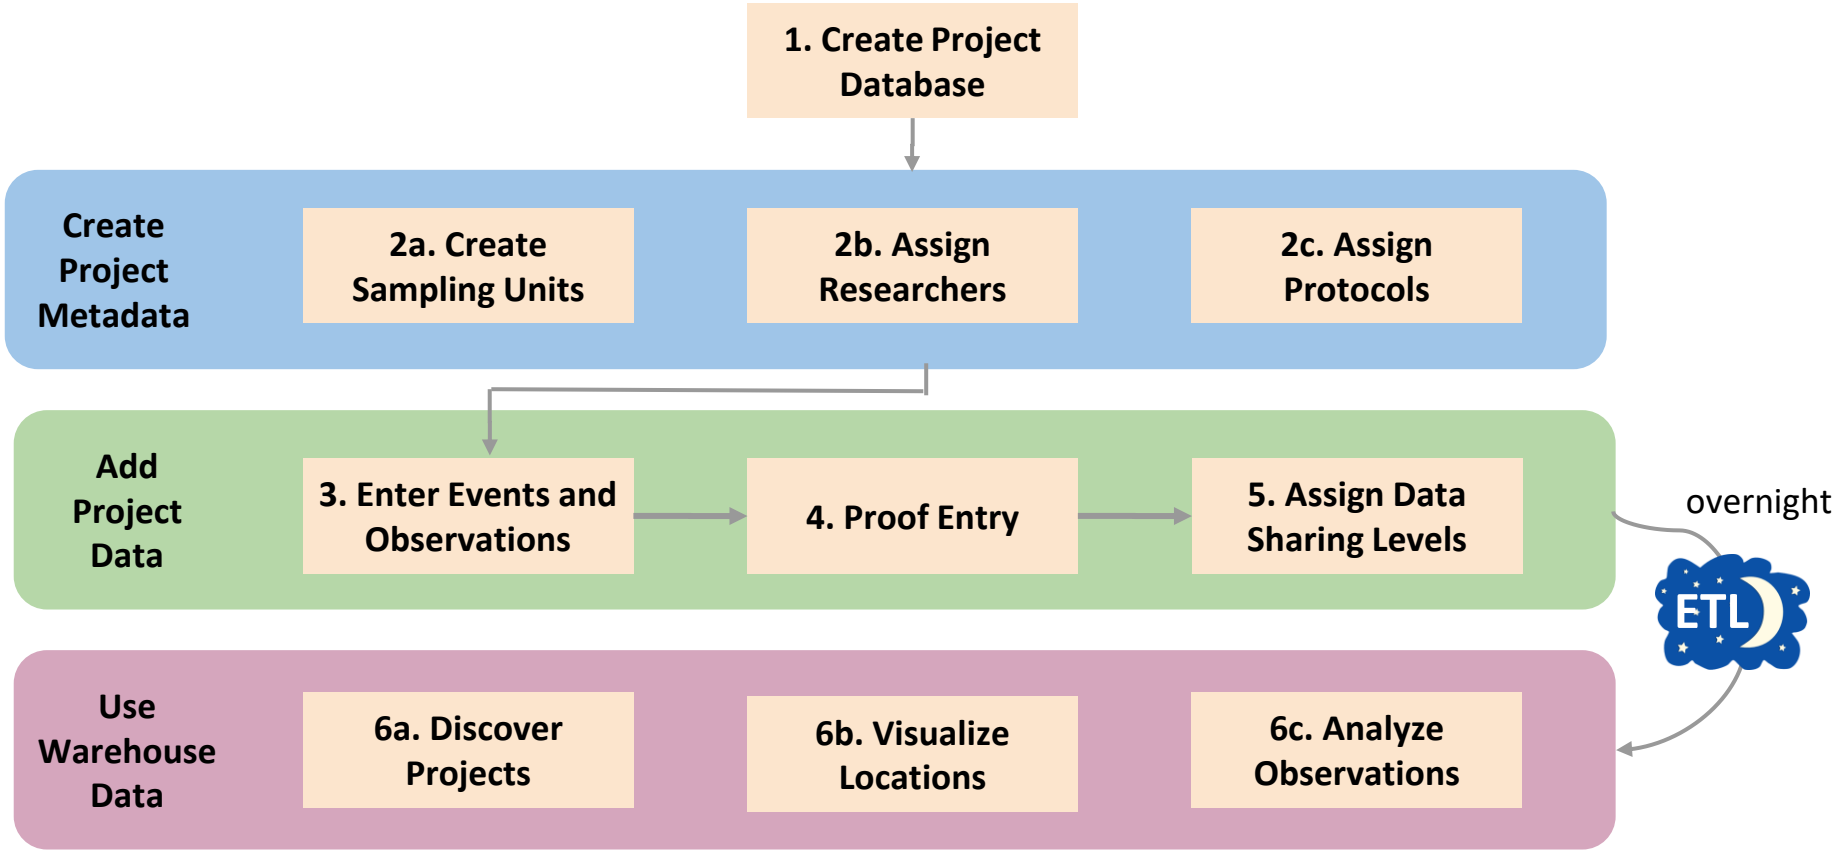
Choices informs the Point Blue Science Cloud tools of your intentions.



Data Sharing Level Motivation

- Organizational Policy
- Federal / State Law
- Research and Right of First Publication
- Threatened / Endangered Species
- Private Landowner Agreements
- Contribute to AKN Science
- Partnership / Collaboration Development

Workflow for Creating a Project



Data Warehouses

Database with homogenized copy of observation data, *organized by sampling method* for cross-project query and analysis

Project data input today shows up automatically in the warehouse the day after you enter it

Project Data vs Warehouse Data

Point Count Data

Same: Species, Count, Protocol, Locations, Detection Cues, Observation Time, Data Sharing Levels

Differences: Binned Distance averaged, Comments missing, no Site Conditions, Observer Names to Initials, no Time Bin

Data Sharing Guidelines/Policies and Agreements

Data Ownership and Control

Project Leaders / Organizations are the owner of data from a Project, regardless of where it is stored

Project Leaders can change Data Sharing Levels at any time, including making more restrictive

Partnerships and Contractors

Partner / Contractors

- DoD collects data for a Partnership
- Hiring independent contractors for survey work

DoD

- Wants to ask questions across DoD
- Needs to manage and control all data on installations

We want data collected on/near DoD installations in DoD Projects

Using the Analyst Tool
(demonstration)

AVIAN KNOWLEDGE NETWORK

Tools:

- https://data.pointblue.org/apps/analysts/

Common Name	2013	2014	2015	2016	2017	2021
Acadian Flycatcher	6	11	25	12	14	15
Alder Flycatcher	0	0	0	0	1	0
American Crow	41	28	42	29	24	113
American Goldfinch	14	1	5	6	3	16

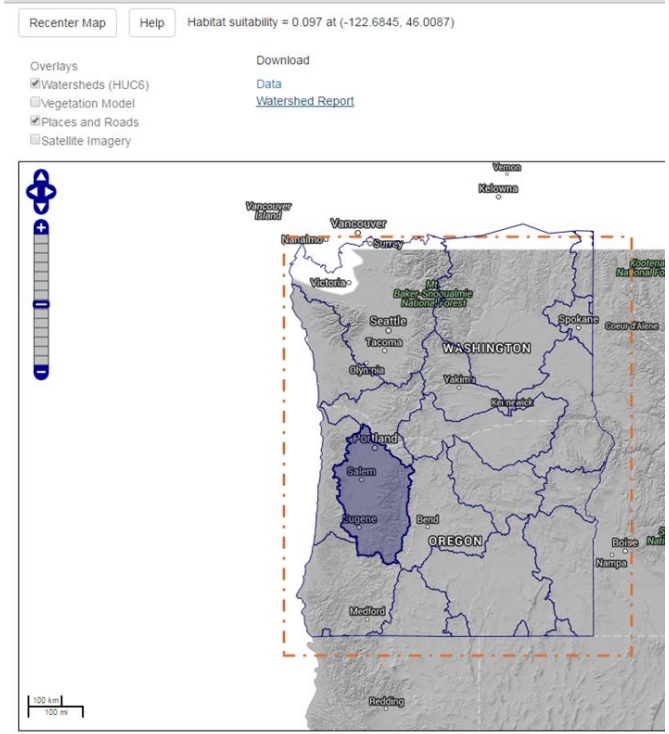
http://data.pointblue.org/apps/nwcsc/



What should you expect this year with AKN and DoD participation?

Legal Drivers

- Migratory Bird Treaty Act (PL 65-186; 16 USC 703 *et seq*.)
- Sikes Act (PL 105-85, as amended through 2004 including PL 108-136; 16 USC 670 *et seq*.)
- Executive Order 13186 *Responsibilities of Federal Agencies to Protect Migratory Birds*
- DoD Instruction 4715.03, *Natural Resources Conservation Program*
- National Environmental Policy Act, as amended. (PL. 91-190, 42 U.S.C. 4321-4347, as amended by Pub. L. 94-52
- Endangered Species Act (16 U.S.C. 1531-1544, 87 Stat. 884), as amended – PL. 93-205
    - Prioritize species
    - Facilitate and encourage collaboration with partners
    - Focus research and planning efforts
    - Increase information sharing

DoD AKN Strategic Approach

- DoD AKN Program Management Plan
- OSD and Military Services Support
- Cooperative Agreement
- Updates on Service-specific Work
- Planned Updates, Tools, Data Initiatives
- Case Studies
- On-going Support

DoD AKN Program Management Plan

- Outlines plan/strategy for DoD and AKN
- Background and work-to-date
- Data problems and solutions
- Outline goals and objectives for program
- 5-year needs for new tools and tasks; includes rough budgets
- Approach and work plan for each task
- Agencies and organizations involved and responsibilities

DoD AKN Program Management Plan

5-Year Needs/Initiatives

- ***Training***
  - Instructor-led training courses (in-person and virtual
  - Create video trainings for common actions (continuing)
  - Monthly "Office Hours"
- ***DoD-Specific Tools***
  - DoD AKN portal page
  - DoD user guide
  - DoD data standards
  - Scope of work language for contractors
- ***Data Initiatives***
  - Mission-Sensitive Species data
  - MAPS and banding data (cost-share)
  - BASH data
- ***AKN Tools (partner initiatives)***
  - Program query tool
  - "Contractor" role
  - "Analyst" role
- ***On-going Support***
  - DoD Program Management
  - Historical data updates
  - Technical support
  - Annual maintenance

OSD and Military Services Support

- ***Office of Secretary of Defense and Military Service Support***
  - Ryan Orndorff and Liz Galli-Noble-Office of Secretary of Defense
  - Karla Meyer & Kirsten Christopherson-Air Force
  - Brian Moyer & Steve Sekscienski-Army
  - Jacque Rice-Marine Corps
  - Jeff Gardner, Jeff Gardner & Tom Mayes-Navy
  - Alisa Dickson & Jay Rubinoff-National Guard
- ***DoD Support Memo***
  - Signed 24 June 2022
  - Mandate use DoD-wide
- ***DoD-wide Cooperative Agreement***
  - Allows oversight of all AKN actions
  - Cost-share actions
  - Enable Military Services and installations to empower smaller amounts of $$
  - Allows MIPR for funding our program partners

Military Service-Specific Actions

Air Force

- Funded two virtual trainings, Nov 30 – Dec 1, 2022 and February 7 & 8, 2023
- Funded initial training videos-COMPLETE; available on AKN YouTube Channel
- Funded five MSS Initiatives, BUOW first
- Funded data discovery survey, data prioritization, assistance with set number of data sets

Navy

- Funded data discovery survey and data prioritization
- Funded SOW language for contractors

Army

- Initial steps for data discovery survey for informed decisions

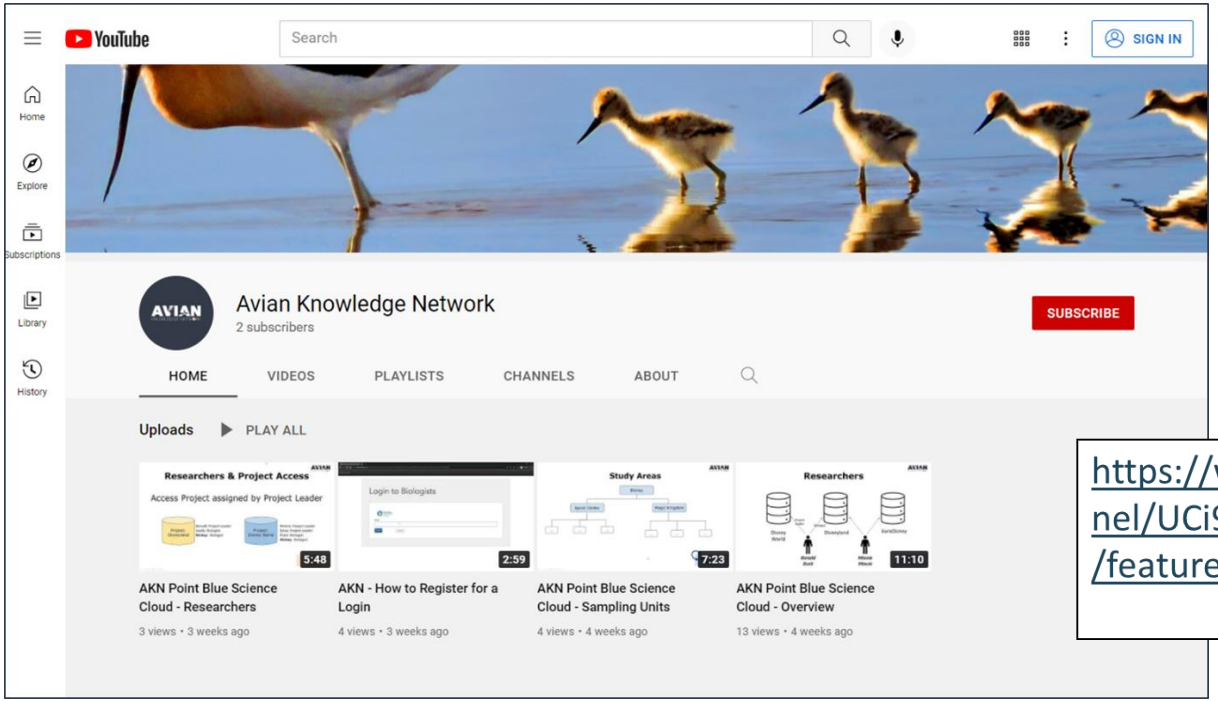
Marine Corps

- Commitment to fund improved tools and training
- Developing solid 5-year investment plan for trainings, data support, and tool development

National Guard

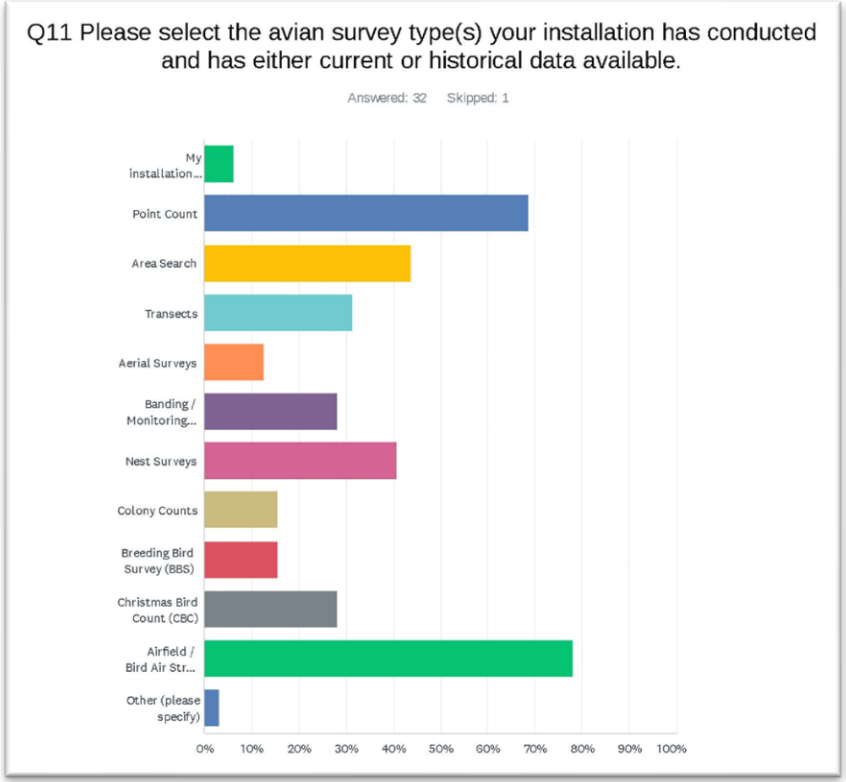
- Need to work with States
- ARNG Environmental Advisory Council's Conservation Committee approved Guard-specific training for FY23 hosted by ORARNG

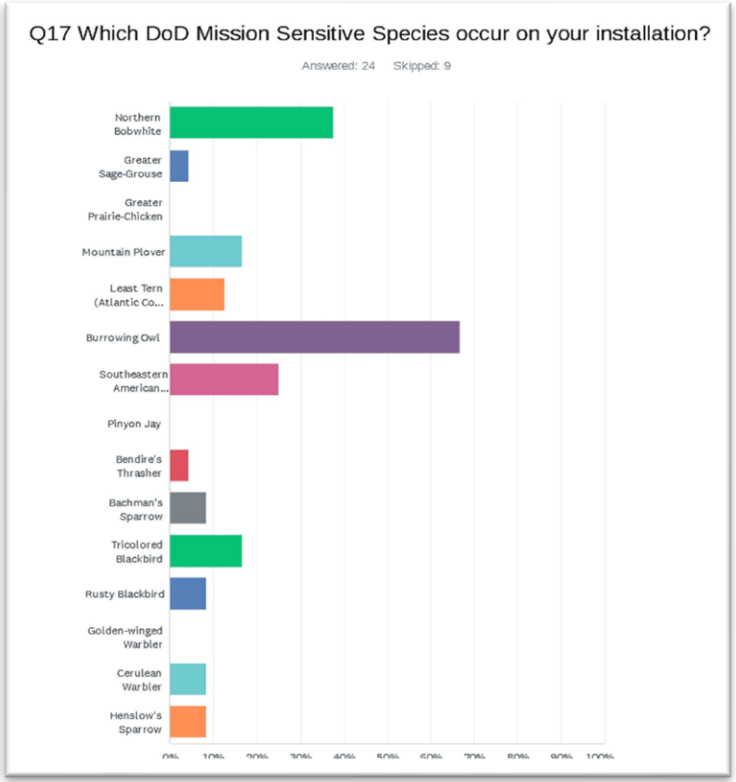
Training Materials



https://www.youtube.com/channel/UCi9in_tC9uTZa9Bo3HgnY1Q/featured

Data Discovery Survey & Training Questionnaire





DoD Mission-Sensitive Species (MSS)

Northern Bobwhite

Greater Sage-grouse

Mountain Plover

Greater Prairie Chicken

Burrowing Owl

Least Tern (Atlantic Coast)

Cerulean Warbler

Golden-winged Warbler

Pinyon Jay

Southeastern American Kestrel

Henslow's Sparrow

Rusty Blackbird

Bendire's Thrasher

Tricolored Blackbird

Bachman's Sparrow

DoD MSS

Species	# of Installations
Greater Sage-Grouse	6
Greater Prairie-Chicken	3
Northern Bobwhite	70
Southeastern American Kestrel	14
~~Black Rail**~~	~~5~~
Mountain Plover	16
Burrowing Owl	50
Least Tern (Atlantic Coast Pop)	18
Pinyon Jay	7
Bendire's Thrasher	4
Golden-winged Warbler	24
Cerulean Warbler	30
Bachman's Sparrow	24
Henslow's Sparrow	25
Tricolored Blackbird	15
Rusty Blackbird	30

DoD MSS Initiative

DATA

- Locate historical and contemporary data
- Identify and prioritize datasets and projects for AKN integration

FIELD METHODS

- Identify SMEs for each species and categorize acceptable and appropriate survey methodologies
- Work with DoD PIF Research and Monitoring Working Group

DATA ENTRY PROTOCOL

- Upload data protocols into AKN, ready for use by any user

MSS QUERY TOOL IN AKN

- Add MSS as a guild in tools, such as Analyst and Data Downloader

DoD MSS Initiative: *BUOW*

Data Survey

- Survey installations with BUOW
- Historical and contemporary data discovery and prioritization

DoD Focus Group of SMEs

- Identify SMEs for BUOW
- Clarify objectives
- Field method review
- Standard monitoring methods (acceptable and appropriate)

AKN Data Protocols

- Bulk upload
- Data entry user interface

Science Delivery

- Custom queries and analyses
- Decision support tools

✓ Standardized Monitoring Strategies for Burrowing Owls on DoD Installations (Garcia et al 2008)

✓ Burrowing Owl Survey Protocol and Mitigation Guidelines (California Burrowing Owl Consortium 1993)

DoD MSS Initiative: *PIJA*

Data Survey

- Survey installations with PIJA
- Historical and contemporary data discovery and prioritization

DoD Focus Group of SMEs

- Identify SMEs for PIJA
- Clarify objectives
- Field method review
- Standard monitoring methods (acceptable and appropriate)

AKN Data Protocols

- Bulk upload
- Data entry user interface

Science Delivery

- Custom queries and analyses
- Decision support tools

✓ Data Standards and Survey Protocol for Pinyon Jays Version 1.0 (Pinyon Jay Working Group 2021)
✓ Guidance for Locating Pinyon Jay Nests and Confirming Breeding (Pinyon Jay Working Group 2021)

DoD Data Needs

- BASH Data, specifically data collected by USDA-WS
- Banding data including MAPS
- Nest data
- Sensor and machine-collected data
- Survey 1,2,3 cross-walk directly into AKN
- Foreign OCONUS data

DoD-Specific Tools

Contract Language

- Possession of data collected by contractors is an issue identified by NMFWA Bird Conservation Working Group since its inception in 2014
- AKN offers a mechanism and structure
- Develop guidelines and language for DoD personnel to integrate into contracts
  - Option to upload directly into system (current limitations)
  - Option to deliver data in format acceptable for immediate upload into system

AKN-wide Tools

Enterprise Support for Programs

Need: Data curation, management, and analysis at multiple scales (installation, Military Service, and DoD-wide)

Solution: AKN-wide structure allowing multiple Project grouping via Programs.

Plan: Add ability to create/manage Programs appropriately based on rights, especially for query and download of project data, user access management, protocol assignment, data sharing level.

Status: Completed the program enterprise warehouse feature preliminary research phase and are moving on to the prototype phase, where we will attempt our first successful build of a program warehouse. Expecting to roll out in next 18 months.

AKN-wide Tools

Updated User Roles

Need: Roles within the system that meet partner requirements for data entry and/or analysis for portions of AKN projects

Solution: Creation of two new user roles that meet identified needs

Plan: Creation of Contractor Role - Create a new role to support contractor who gets access (data entry, data download, data analysis) for the portion of a Project for which they are providing services.

Creation of Analyst Role - Create a new role to allow full access to a Project or Program for data download and analysis, but not ability to manage metadata or user access.

Status: Needs and roles identified and prioritized. Awaiting completion of the Enterprise Support for Programs.

DoD Use and Case Studies

Barry M. Goldwater Range (BMGR), AZ

- Participating in Desert Thrasher Working Group
- Existing protocol in the AKN system
- Critical to add data to DoD-owned project
- Conducted surveys and entered data into BMGR project using desert thrasher data entry protocol available in AKN
- Shared data with thrasher initiative
- Data will show when querying DoD data for this species

Fort Hood, TX

- Modified existing protocol to meet data entry needs for three survey types
- Structured sampling units across installation
- Bulk uploaded over 3,000 rows of data: now direct entering survey data

Project Protocols

open new project | FORT_HOOD - [DOD_ARMY] Fort Hood

add one | copy tal

Protocol Id	Protocol Name	Protocol Type
FTHOOD_WEATHER_COWS	Weather with temp, wind, sky, and precipitation, and total number of cows	SiteConditions
FTHOOD_WEATHER_FALL_COWS	Weather with temp, wind, sky, and precipitation, and total number of cows for fall point counts	SiteConditions
VCP100Sx	Variable Circular Plot, exact distances to 100m, then >100 with AnimalSex, and bins over 100m for NOBO	PointCount
VCP_60m_4db	Variable distance point count 60 minutes with 4 distance bins <100, 100-250, 250, 500, >500	PointCount

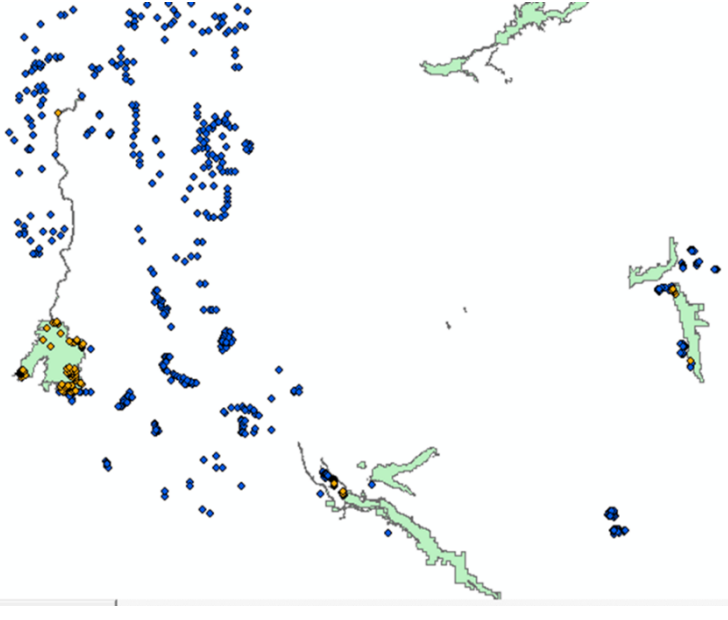
4 rows

MA Army National Guard

- Biologist leaving position one week after training
- Had 20+ years of data
- Working through data, realized inconsistencies in data entry
- Standardized protocol in system, showing required fields to be utilized in all future surveys
- Successfully uploaded 35,000 records prior to leaving DoD
- Data ready and available to successor

USACE-Willamette Valley Project, OR

- New biologist took DoD AKN training at NMFWA
- Worked with DoD AKN Team to ID data within boundary
- Data was both USACE and partner data
- Created USACE WVP within USACE enterprise
- Gained access to USACE-owned data
- Reaching out to partners about sharing data within boundary



Vance AFB, OK

- Biologist was new to AF and did not have any bird data
- Wanted a list of birds on Vance for NEPA and INRMP updates
- RAIL tool available at no cost and without an account

Integrates data from AKN, Partners in Flight, US Fish and Wildlife, Breeding Bird Survey, eBird, All About Birds, and the Macaulay image library at Cornell.

DoD Mission Benefits

- Secure database to input/upload, curate, and manage DoD field data
- Empowers historical data
- Assess status of birds on/near installations
- Monitor trends at multiple scales
- Data sharing and integration with partners
- Advanced data analysis and visualization tools
- Access to data that contributes to more technically and scientifically sound INRMPs and NEPA environmental reviews
- Contributes directly to proactive conservation, monitoring and management of priority bird species

Enabling the Mission, Defending the Resources
